BIENNIAL REPORT
of the
**SUPERINTENDENT OF PUBLIC
INSTRUCTION**
of
NORTH CAROLINA

1940-41 AND 1941-42

PART I

SUMMARY AND RECOMMENDATIONS

Issued by the
STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
RALEIGH, NORTH CAROLINA

SUMMARY OF RECOMMENDATIONS

(See p. 99 for full recommendations)

1. *Increase in State Funds (Requested):*

	1943-44	1944-45
Vocational education	\$ 806,111	\$ 860,111
Rehabilitation maintenance	12,000	12,000
Industrial Arts	50,000	50,000
Vocational camps	5,000	5,000
Adult education	48,000	50,000
Textbooks	400,000	400,000
Public School support—		
(a) Present program	30,326,177	31,186,915
(b) Plus ninth month	33,781,022	34,746,378
(c) Plus 15 per cent for salaries	34,380,608	35,325,292
(d) Both (b) and (c)	38,326,271	39,386,065

2. *A State-supported Nine Months School Term.* The sum of \$3,454,845 is requested for the support of the ninth month of the school term.
3. *Salary increase.* "That a 15 per cent increase in salaries effective with the school year 1943-44 be granted to all school employees."
4. *Vocational Education.* See requests under 1 above for expansion of the vocational education program.
5. *Compulsory Attendance.* The present maximum age of enforcement should be raised from 14 to 16 years, and machinery for the enforcement of the law should be provided.
6. *Health and Physical Education.* The program of health and physical education should be expanded to cover the entire student enrollment.
7. *Adult Education.* An additional annual appropriation of \$18,000 is requested. The work should be expanded.
8. *Exceptional Children.* A small appropriation should be made for carrying on an experimental program in one or two selected areas of the State.
9. *Supervision of Instruction.* The qualification of newly-elected superintendents should be raised to include professional training, and serious consideration should be given to the question of supervision of instruction in the various administrative units.

STATE OF NORTH CAROLINA
SUPERINTENDENT OF PUBLIC INSTRUCTION
RALEIGH

CLYDE A. ERWIN
Superintendent

November 1, 1942.

*To His Excellency, GOVERNOR J. M. BROUGHTON
and Members of the General Assembly 1943:*

HONORABLE SIRs:

Pursuant to law, I am submitting this Report of the Superintendent of Public Instruction for the biennium ending June 30, 1942.

In this Report an effort has been made to give an overall picture of the public school situation as it obtained at the end of this biennium. The Report also indicates the progress made in improving the educational opportunity afforded the boys and girls of this State during recent years.

I believe that you will be pleased with what has been done during the past several years toward the improvement of our educational facilities. There are still other points in this great State activity that need strengthening, however; and to these needs, as they have been outlined under the section "What the Schools Need," I wish to call your special attention.

Very respectfully yours,

State Superintendent of Public Instruction.

WHAT THE SCHOOLS DO

INTRODUCTORY STATEMENT

The biennium (1940-42) which this Report covers marks the end of that period in the history of public education in this State characterized as the eleven-grade program. True, some administrative units, largely city, have from funds realized from local sources supported a twelve-year program of instruction; but the State school system as a whole has been defined by law as consisting of "eleven years or grades," with the first seven years or grades styled the elementary school and the last four years or grades, the high school.

The General Assembly of 1941 enacted a law, chapter 158, which provided for the extension of the public school system to embrace twelve grades, the cost of the same to "be paid from the appropriation made for the operation of the State eight months' school term in the same manner and on the same standards."

The act reads in part as follows: "That upon the request of the county board of education or the board of trustees of a city administrative unit, the State School Commission shall provide for the operation of a school system to embrace twelve grades in accordance with such plans as may be promulgated by the State Superintendent of Public Instruction in any high school district for which such request is made at the time the organization statement is submitted."

Going from an eleven- to a twelve-year system is a matter of first-rate significance from the standpoint of instruction. The fact that pupils have an added year of maturity is significant in their development. The twelve-year program makes it possible for children to have more time in the elementary school to complete what has heretofore been undertaken. This added year of work and maturity will mean much in the achievements of students on the high school level. They will have an opportunity to complete the public school program in a manner which will make it possible for our schools to compare more favorably with schools in other states, most of which have twelve-year programs.

A bulletin, Publication No. 235, suggesting a twelve-year program for the schools in the State, has been issued. This publication was prepared by committees on language arts, mathematics, social studies, science and health and physical education, art, music, vocational education, industrial arts, and guidance. After setting up the objectives of the twelve-year program and stating some problems relating to the organization and administration of schools, the various committees outlined a course to be followed from grade one through grade twelve. Space does not permit

a detailed statement of what was undertaken in each subject or at each grade level. It may be stated, however, that the additional year or grade was put in the elementary school as an eighth grade. It may be stated also that the committees made their plans and suggestions for the elementary school in terms of grades one through eight, spreading the work to be accomplished over a period of eight years rather than seven years, as under the old program. Significant changes were made in most of the subjects in the elementary school.

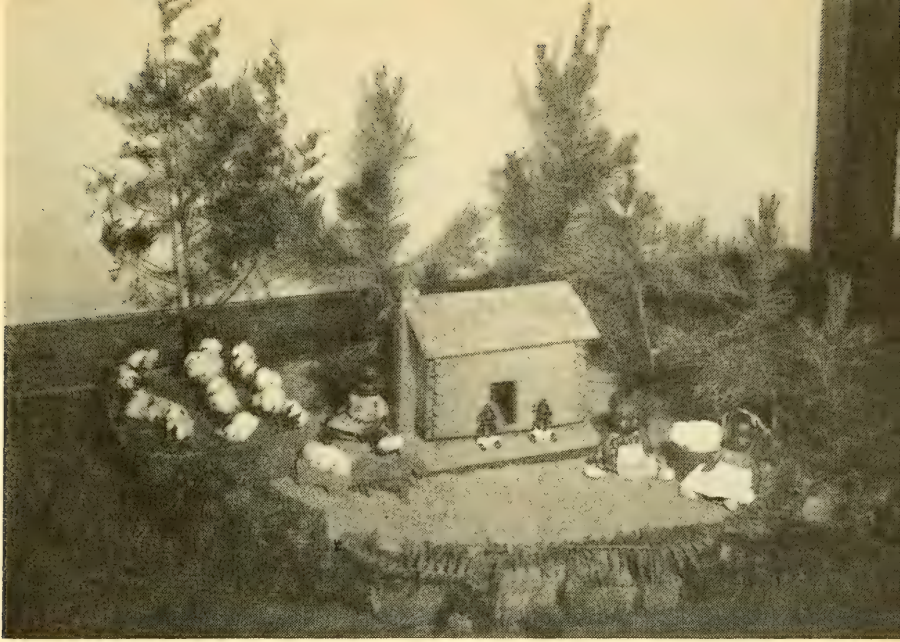

The high school course of study was not changed substantially, the subjects remaining about the same for the four years of instruction following the eight-year elementary school. However, it was decided that only one year of mathematics in the high school should be required for graduation; that no foreign language should be required for graduation after 1942-43; and that physical and health education should be a required subject in the ninth grade, or first year of high school under the twelve-year program. The new high school program provides for vocational education, including home economics and agriculture; business education; industrial arts; music; art; physical and health education in addition to those subjects which have been spoken of heretofore as the fundamental subjects.

The program of instruction under the new twelve-year plan will enable students in North Carolina to graduate from a high school offering an opportunity more nearly equal to that which students in many other states have enjoyed for many years. The enlarged program will unquestionably contribute greater knowledge and efficiency in developing better prepared citizens of the State.

SOCIAL STUDIES

No subject of the public school program today offers more opportunities for developing an understanding of the interrelationships of people and the use of democratic techniques than the social studies. In social studies courses students draw upon many subjects in the curriculum—mainly history, geography, science, civics, sociology, and economics—in finding facts which are needed for the solution of a problem.

The public schools have felt their responsibility in making democracy a real experience in the classroom. The need for each individual to be a participant in democratic living has been recognized. However, recent and present international developments have impressed this responsibility even more deeply upon teachers and administrators. The schools' obligation to give pupils information and experiences needed for effective democratic living is being met in two ways: First, in the organization and operation of the school; and second, in the regular classroom

Cotton plantation scene by a seventh grade group.

instruction in the elementary school and in special social studies courses in the high school.

The twelve-year curriculum accentuates the necessity for the development of understandings concerning our economic, social and cultural life. Emphasis is placed on factual information, with pupil participation in the coöperative planning and executing of school work of all kinds. The program also emphasizes the need for studying the immediate environment and the State in general.

The social studies program is designed not only to provide information about man and his environment, but most important of all to train boys and girls for critical thinking and coöperative living. Activities that train individuals to use all available facts in solving a problem; to practice tolerance; to recognize the sense of inter-dependence of man and his environment; to suspend judgment until sufficient evidence has been obtained; and to take a reasonable stand on local, State and national policies are becoming more and more characteristic of the social studies program.

In the revised course of study geography and history in the elementary grades are closely correlated and in some cases fused. Separate subjects are given in the high school. The general topics for each year are: First, Living Together in School and Home; Second, Living Together in Our Community; Third, Community Living Now and Long Ago; Fourth, Selected Peoples of Other Lands; Fifth, The Story of the United States; Sixth, How the Present Grew Out of the Past; Seventh, United States

History and Relationships with Neighboring Lands; Eighth, The Story of North Carolina; Ninth, Living Together in Our Democracy; Tenth, World History; Eleventh, American History; Twelfth, Modern Problems.

In 1941 a curriculum bulletin, *Teaching Democracy in the North Carolina Public Schools*, was furnished to each school in the State. This publication was the result of the coöperative endeavor of the Division of Instructional Service and the 171 school administrative units of the State. It is designed to assist local schools in developing democratic procedures in all of our educational endeavors. Some of the topics discussed in this bulletin are: Planning to Preserve a Democratic Society; The Role of the Public School in Advancing Democracy; Education for Democracy in the Public Schools with Materials for Programs for Years 1-12; Symbolism and its Place in the Program; Activities Productive of Democratic Traits and Skills; Analyzing Propaganda; Handling Controversial Issues; and Developing Leadership.

Through bulletins, administrative unit group meetings, and professional study groups, the public schools are striving to make the social studies work functional and meaningful in the life of the individual, vital in community understandings and developments, and effective in better understanding national and international relationships. To this end instruction has been cognizant of current happenings, but not absorbed in them to the extent of losing a perspective of the struggles

Much youthful thinking, planning and doing went into the preparations of this circus. Ingenuity, resourcefulness and cooperation made it a successful, enjoyable adventure.

of the past in our country's development. Literary readings, a wide use of the newspaper, magazines and radio forums are encouraged, particularly on the high school level.

LANGUAGE ARTS

Reading, speaking, and writing are rated among the chief attainments of pupils of any school age. Today, more than ever before, the need to speak, to write and to read well is recognized by people in all industries and professions. Educators have been giving increased attention to these needs and have developed scientific means of determining reading difficulties to the end that they may be eliminated. Many children in our State need special help in developing skills in the language arts that they may measure up to standards for the country and have equal facility as they compete with other citizens in an economic world.

Our need in the field of language arts has served as a theme for many of the investigations, research studies, and discussion groups held throughout the State during the past two years. As a partial result of the use of more scientific methods in studying the individual child and his readiness for speaking and reading at any grade or growth level, more is known about the beginning point in the child's progress in speaking and reading; and there is a more accurate knowledge of the child's abilities, capacities, deficiencies and handicaps as related to his daily progress in the language arts.

During the past year special committees and groups representative of every phase of the language arts work in the public schools as well as of the several divisions in school organization—primary, grammar grade and high school—have been at work on the detailed problems involved in pupil instruction in the subject areas included in the language arts program. Studies of records, reports of testing programs, and actual observations of children at work have revealed deficiencies and difficulties in the way of pupil progress. Intensive work by these committees has been centered largely on developing a teacher's guide for diagnosing the situation as it concerns the individual pupil and in providing the everyday experiences the pupil needs in his efforts to master the techniques, skills and practices of the language arts curriculum. Records of progress and achievement in some schools and recommendations for all schools are included in publications issued by the State Superintendent of Public Instruction.

With this basis of procedure—a thorough-going and scientific study of the situation regarding the language arts and improved methods of instruction and evaluation—progress is being made in raising the level of

Even first graders work in committees when the job is as attractive as building a play house for a family of dolls. Much discussion, evaluation, and "research" were necessary before this job was completed.

the speaking, reading, and writing achievements of the pupils in both the elementary and high schools of the State.

In the twelve-year program emphasis is given to the importance of a continuous, progressive development of a language arts curriculum adapted to the needs of the individual pupil. Instruction in language arts is not assigned to special teachers except in the high school grades. In a sense every teacher is an English teacher, and only on this theory can the school program be effective in meeting the needs of pupils in their efforts to become efficient in the use of language—in acquiring and in making practical uses of adequate speaking, reading and writing vocabularies.

The proposed eight-year course for elementary schools and the four-year course in language arts for high schools suggests suitable and effective experiences which may be adapted to the growing needs of the pupil. Realizing that growth comes through experience, the school programs now provide a great variety of activities in the fields of dramatics, public speaking, journalism, visual education, the radio, research (library reading), and experimentation. Also, in an integrated program with the fine arts and with the social and natural sciences, there must be guidance which leads to success in acquiring the skills involved in speaking, reading and writing. Guidance and encouragement, as well as appreciation, are necessary in the accomplishment of worthy goals in creative work in the language arts. Sympathetic evaluation of attempts to do creative work is a great stimulation to success on the part of the pupil.

The study of foreign languages is limited to the high school years, grades 9-12. Foreign language is no longer required of every pupil for graduation from the high school. However, provision is made in every high school for offering one or more foreign languages. A committee from the foreign language section of the North Carolina Education Association prepared, during the summer of 1942, a report setting forth the reasons for offering foreign languages in the high school. This report is included in Publication No. 235. The report should be helpful to principals and teachers in guiding pupils in the selection of their courses in high school. French and Latin have been the two languages usually taught. Within the last two years, however, there has been a very rapid increase in the number of schools offering Spanish. German is offered in only two or three public high schools.

In summarizing, it should be recorded that the work in the language arts field during the past two years has been increasingly successful. A larger number of pupils have achieved success in this field. However, the actual results for the total school population are not wholly satisfactory. Therefore, the emphasis should be placed on discovering the beginning point for each pupil and measuring success by the progress of the individual according to his own needs and capacities. Mastery of skills in language arts and a growing interest in the use of these skills should serve to raise to a higher level the present standards in speaking, reading and writing.

SCIENCE

The need for science information as a part of each individual's equipment is being met in the public schools by renewed emphasis on the teaching of science.

A new science course of study for years I-VII was distributed in 1941 to every administrative unit. This guide in science, with the addition of the eighth-year outline under the twelve-year program, gives each elementary teacher, years 1-8, suggested topics or units for the year's work, specific page references to a selected list of source readings of both textbook and library type, and a summary of essential understandings on each of the topics. This material, which many teachers in North Carolina assisted in preparing, recognizes that the individual today is living in an ever greater world of science, with prospects for more demand upon him to use, understand and appreciate its applications as a part of daily living. Therefore, provision is made for natural science to take its rightful place as a regular subject in the child's program, year by year.

The topics suggested for each year help the teachers to maintain a balance in the several major fields from which science is drawn. In each

year's program the child has experiences and study relating to the universe, in which he learns in simplified forms facts concerning astronomy and geology which deal with the earth in relation to the sun, moon, stars, and planets; and the earth and its rocks, its soils, its contours, and its physical structure. Another group of topics, dealing with the "Behavior of Living Things," draws principally upon biology and nature study in relation to adaptation of animals and plants to their environment and to their interrelation and interdependence. A third subject pertains to chemical and physical processes in which are included elementary understandings from chemistry and physics, particularly those which deal with the great laws underlying the conservation and changes of matter and energy, and the sources and uses of power.

Provision is made for expanding and enlarging science ideas, facts or concepts from year to year, avoiding repetition or omissions, and for the functional or useful approach of the subject being studied. Typical of the ten to twelve units for each year are the following: Year I—Animals that we know and hear about get ready for winter in different ways, as the squirrel, birds, bears, snakes, woodchuck. Year II—Some way the sun, moon, and stars help us. Year III—Seeds and how they are scattered, as the maple, dandelion, oak, ash, burdock, milkweed. Year IV—Plants with and without green color. Year V—Migration of birds and other animals. Year VI—Our body needs. Year VII—The solar system. Year VIII—The use of electricity in the home.

The use of experiments for the proof of scientific facts extends from

The science corner in the classroom furnishes inspiration at small cost.

the first through the twelfth years. Those for years 1 to 8 are simple in nature. Textbooks on the State approved list, and other books of experiments only, give a great many experiments covering the topics indicated in the course of study.

Each science teacher in the secondary school has the outline which the teachers use in the elementary school. This provides a continuous program and close articulation between the elementary and secondary school. Where high school students wish to review a topic or to study one omitted in the preceding years, the elementary outline provides source material for them. A study of separate science subjects does not begin until the second year of high school.

Two years of science are required for graduation from the secondary schools, one of which must be in biology. General science is offered in the ninth year, biology in the tenth, with chemistry and physics in the eleventh and twelfth years, respectively. Each accredited high school is equipped to offer three or more sciences. Schools are attempting to build up equipment for science and to provide rooms which are equipped for doing a better type of science teaching. Supplying this equipment is an obligation of the administrative unit, and more and more it will be necessary to provide for this in the capital outlay budget where a school wishes its students to have access to the needed materials and equipment.

The War Emergency

In keeping with suggestions made by military authorities, special emphasis will be placed upon physics in order to equip high school students for service in the armed forces.

HEALTH, PHYSICAL EDUCATION AND SAFETY

There is ample evidence that school programs of health, physical education and safety are improving. This improvement can be seen qualitatively and quantitatively with regard to the following:

Sanitation—While many schools are not satisfactory with regard to toilet facilities, drinking fountains, sewage disposal and lavatories, much improvement has been made.

Health Services—Due to the load already carried by county and city health departments, no appreciable increase can be noted in the health services to school children except as noted under the title of "The War Emergency" below. The dental services provided by the Division of Oral Hygiene of the State Board of Health have been especially worthwhile and deserve special mention.

Health and Safety Instruction—The new adoption of health textbooks, a better understanding on the part of teachers brought about through in-service training of teachers and through better teacher-training programs, more interest on the part of administrators, and an increase in the amount of time allotted, all contributed to an improvement in health instruction. In the high schools more special teachers of health and physical education have been employed than ever before.

Physical Education—Each year there is evidence that more school-teachers are becoming concerned about the physical education program. The thirty-minute per day time allotment required for elementary schools is complied with by most schools, and teachers are more and more accepting responsibility for guiding and directing the physical education activities. The State course of study in health and physical education has provided materials for teachers' use in planning and conducting the physical education program.

A large percentage of the high schools of the State, prior to the declaration of war, had employed special teachers of health and physical education for the required work in the eighth and ninth grades. As a rule, the city schools which employed additional teachers out of local funds have been more successful in providing adequate health and physical education than the rural schools. However, many of the small schools, even without adequate personnel, have provided some opportunities for health instruction and physical education activities for all the boys and girls.

All work and no play would make a dull school day.

Safety—Safety education, by legislative enactment, is required in the public schools of North Carolina. The State Department of Public Instruction, in carrying out the provisions of the law, provides a special bulletin, Publication No. 174, *Health and Citizenship Education, A Suggested Procedure for Teaching Safety and First Aid*. This bulletin is available to every teacher in North Carolina. In addition to this, safety supplementary readers are available for use in the elementary grades and in the high school.

In the elementary grades, in addition to the formal teaching that may be carried on, safety is correlated with other school subjects and is made a part of the daily experiences of the children. The routine school experiences are so planned that children are not only protected from hazards, but also are made conscious of safety to the extent that the habit carries over into life outside of school.

In the high schools safety is sometimes taught as a part of the civics course. Sometimes it is correlated with health and physical education, and occasionally it is included in the sociology course. In other schools a special course in safety and driver-training has been set up. Most of the small schools have been unable to set up special courses in safety without omitting some other subject generally included in the curriculum.

There is a need for more teachers who have had special training in safety education. At present few of our colleges give adequate courses in this field.

The War Emergency

In response to a request from Governor J. Melville Broughton and in compliance with suggestions drawn up by a special committee appointed by the Governor, an Emergency Program of Health and Physical Education was initiated by the State Department of Public Instruction after the United States entered the War. In addition to the regular program carried on by the schools, it was proposed that health and physical education be set up as a required part of the curriculum for all boys in grades ten and eleven in eleven-year systems and grades eleven and twelve in twelve-year systems. It was recommended that the courses include the following:

1. A complete physical examination of all the boys, the examination to be one comparable to that given by the Army.
2. A follow-up program to correct remedial defects revealed by the examination. The health service, it was stated, should be financed by parents when financially able; and when not, this service should be taken over as a community responsibility by health departments, welfare

agencies, civic organizations, or by voluntary services of the medical profession.

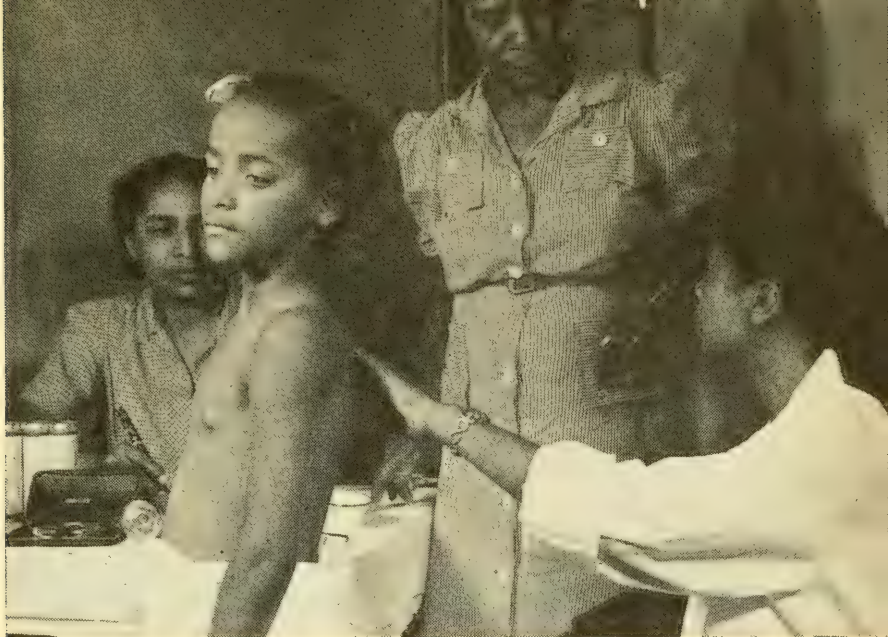

3. A program of health instruction, including a study of nutrition, care of the body, sanitation, first aid and prevention of communicable diseases. It was suggested that health instruction, including first aid, safety, home nursing, and nutrition be provided for all girls.

4. Physical education—games, athletics and sports; rhythmic; swimming and life saving, wherever possible; out-of door activities, such as camping and hiking; informal activities and everyday skills, such as walking, cycling, etc.; and conditioning activities such as calisthenics or setting-up exercises.

5. Courses in safety, including fire prevention, safety against air raids, incendiary bombs, home and school safety, safety in recreation, industrial safety, traffic safety and driver education were recommended whenever facilities and personnel made it possible.

The extent to which schools responded to the emergency recommendations is shown by the tabulated results as indicated in the Principals' Annual Reports, all of which are not in at the time this report is being prepared. It should be remembered that the success of the program was achieved in spite of the fact that over half of all the men teachers of physical educa-

The physical fitness program not only improves bodily activities during the growing period; it also prepares youth for war-time activities.

Physical examinations and health check-ups constitute an important phase of the child health study.

tion resigned their jobs before the close of the school year and over ninety per cent at the end of the year.

<i>No. Students</i>	<i>Boys</i>	<i>Girls</i>	<i>Total</i>
Given medical examinations.....	28,194	11,547	39,741
Given dental examinations.....	15,786	595	19,480
Enrolled in physical education.....	44,423	46,086	90,509
Enrolled in health and safety classes—			
Nutrition			37,597
First aid			43,311
Communicable disease			26,092
Safety			37,088

The physical examinations were endorsed by the North Carolina Medical Society and the Old North State Medical Society (Negro), and were sponsored by the State Board of Health and the State Department of Public Instruction.

Medical Examinations—The medical examinations were carried out by city and county health departments, local draft examining boards and by the voluntary services of private physicians and dentists. Incomplete results of the examinations for 13,814 students of the two upper

classes of high schools, as shown on Principals' Annual Reports, indicate that a large percentage of those examined have some physical defects. The table below shows some of the results in percentages.

PERCENTAGE OF HIGH SCHOOL BOYS AND GIRLS FOUND WITH
PHYSICAL DEFECTS AMONG 13,814 EXAMINATIONS

	Per Ct.
Dental defects	85
Defective vision	16
Hernia (not all serious).....	2
Diseased tonsils	14
Ten per cent underweight.....	16
Ten per cent overweight.....	7
Heart abnormalities	1.5

Other facts revealed in the examinations:

Tuberculosis—17 clinical cases of tuberculosis were found from an X-ray examination of 1,408 boys.

Wasserman test—6,757 Wasserman tests revealed 41 positives.

Dental Examinations—The North Carolina Dental Society made a special dental survey in sixty counties of North Carolina. Fifteen thousand, seven hundred and eighty-six boys of the junior and senior classes were examined. Of this number approximately 85 per cent needed dental attention. The survey revealed that 46,991 fillings were needed, 14,028 permanent teeth had already been lost, and that 3,196 teeth needed to be extracted. It was also revealed that over 25 per cent of all those examined had diseased gums.

Follow-up Work for Correction of Defects—It is early to determine the amount of corrective work that follows the medical and dental examinations, due to the fact that many of the schools closed soon after the completion of the examinations. Incomplete reports, however, show that considerable amount of corrective work has been done, both before and after schools closed. One school, for example, reported three hernia operations. One of the boys needing treatment for tuberculosis has been sent to a sanatorium.

School-Health Coördinating Service

As was stated in the preceding Biennial Report, the Division of School-Health Coördinating Service was organized during the early months of the fiscal year 1939-40. This Service is jointly operated by the State

Teachers make use of microscope in study of communicable diseases.

Board of Health and the State Department of Public Instruction with financial assistance from the Rockefeller Foundation. The staff includes a coördinator (director), a nutritionist, five experienced white nurses, a physical and health education adviser, an associate physical education adviser, a Negro physician, and a Negro health education worker.

The program, as originally set up, was to cover a five-year period; continuation at the end of this period was to be determined in accordance with the success of the work and upon legislative appropriation. The aim of the Service is to coördinate the facilities of the State Board of Health and the State Department of Public Instruction to the end that better programs of health and physical education may be developed in the public schools of North Carolina.

During the school year 1939-40 the School-Health Coördinating Service concentrated most of its activities in six counties—Hyde, Tyrrell, Halifax, Washington, Wayne and Craven. Additional work was carried on by some of the nurses in Northampton, Clay, Cherokee and Graham counties. During the school year 1941-42 follow-up activities were emphasized in Halifax, Orange, Person, Chatham, and Stanly counties. Wayne County was the center of the main portion of the work during the latter part of the school year 1941-42.

During the summer of 1941, with the assistance of a grant from the General Education Board, Child Health Conferences (summer teacher-training courses, six weeks in length) were held at three educational institutions—the University of North Carolina, Woman's College of the University of North Carolina and the North Carolina College for Negroes. During the summer of 1942 Child Health Conferences were con-

ducted at the above-named institutions and at Bennett College, Greensboro, N. C. Scholarships provided by the General Education Board covered the tuition and a stipend for living expenses for those attending the conferences. Among the 110 persons who attended the white institutions and the 99 Negroes who attended the Negro institutions were teachers, public health nurses, State Department officials and school administrators. Thirty-five persons from Mississippi, Florida, Virginia, Tennessee, Louisiana, South Carolina, Georgia and Arkansas, who were given special fellowships by the General Education Board, also attended the summer conferences.

In conjunction with the course of instruction provided, a demonstration Child Health Camp, composed of twenty to thirty malnourished children, was conducted at each of the institutions. The Camp was used as a medium for child health study and as a demonstration of the effects of an adequate diet at a low cost.

ART

More and more, art is being recognized in the public schools as one of the fundamental subjects in the child's total school program, years one through twelve. The day of "studio art," in which a few talented pupils were thought to be artists and taught to paint and draw, has passed away and in its stead art in a broad interpretation is seen functioning in every phase of living.

Each individual uses art as a consumer in his personal choices, in home decorations, in architectural design, and in selections and combinations of colors. Therefore, each person enrolled in the public schools, years I-XII, should have guidance in art principles, in order that he may have more discriminating taste, an outlet for creative desires, and a worthy recreational activity.

A new course of study, *Art in the Public Schools*, which emphasizes the importance of art instruction, outlines suggestions, and the kinds and amounts of materials needed, was prepared during the summer of 1942 and distributed to the schools during the fall. The contents of this bulletin include: Major Purposes of the Art Program in Relation to the Child; A Working Plan for the School; Procedures in Teaching Art; Sources of Themes for Art Expression; and Directions for Doing a Large Number of Crafts, typical among these being: making flower blueprints, wood carving, carving in plaster of Paris molds, charcoal drawing, finger painting, homemade lantern slides, marionettes, clay modeling, papier-mache work, painting on glass, block printing, and weaving rugs and fabrics.

Soap sculpture and other art by fourth grade pupils.

Art in years I-VIII is taught by classroom teachers. In the secondary schools, where teaching is by subjects, it is more difficult to bring in art activities as a part of other subject courses. There were 32 high schools in 1941-42 with regularly trained art teachers devoting full time to that subject. It is believed that the new art course of study will promote more art work in the school through its suggestions for the regular teachers. The same types of art experiences are included in the secondary school program as in the earlier years, with additions and special atten-

tion given to interior home design, textiles, costume design, mechanical drawing, architecture, landscaping, advertising and display, photography, cartooning and caricature, and painting. The high school course has art work outlined for each year IX-XII in twenty-four different activities, such as interior design and drawing and painting, with each year's work planned on an advanced level.

An encouraging feature of the art work in the schools is the great variety of materials from which art products are made and the use of local resources in art projects. This great variety was exemplified in a recent exhibit of art products made by public school students out of local materials displayed at the National Convention of Governors in North Carolina. Students chose their own media of expression. Some of the items were products of brass and copper, book-ends of wood, wooden buttons, plates, large novelty pins symbolizing the tobacco leaf, bracelets carved of wood with the State dogwood flower design, hand loom made rugs of usable sizes, hand hooked rugs and mats, hand woven cloth for scarfs and purse bags, hand woven cloth designed and made into luncheon sets and towels, papier-mache objects in toys, pieces of hand-turned and wheel-turned pottery, leather tooled bookmarks, metal plaques and trays, paintings, block printing, sketching and lithograph work.

While schools have been resourceful in using local products, some materials must be purchased for an art program. Where the administrative unit's budget provides at least a minimum basic supply of art materials to be provided for each school, opportunities for students are more equal and advancement of pupils is faster.

MUSIC

Evidence of rapid growth in music achievements in the schools is shown by the activities all through the year and by the annual reports at the close of the term. This is in a measure due to the fact that schools are now provided with materials of instruction (free textbooks and supplementary materials in music) which are in daily use in the schools; that the number of public school music teachers has increased; that a well-organized and definite course of study is available to every teacher; and that allied institutions and organizations are joining hands with other education forces in an effort to provide every child with definitely organized and sequential music experiences throughout his twelve years of public school. While it is the obligation of organized education to provide experiences in music for every school child, it has also become the responsibility of the home and the community to foster and promote the development of the innate musical interests and abilities of the children.

With the opening of schools in 1942-43 there will be available a new curriculum bulletin in music education. This bulletin is designed to aid or guide teachers in their efforts to improve the instruction in our schools and offers many illustrations of successful practices and procedures in meeting the needs of the individual child.

While the main purpose of the music education program in the public schools is to develop the child's innate musical interests and abilities, consideration is given to the basic thesis that the child is being taught through music. Therefore, the abilities and needs of the individual child are paramount rather than the forcing of the child into a specific musical mold.

A second consideration in the practical working out of the program has been the advancement toward the attainment of the primary objective of all music education in the public school; that is, the awakening and the development of every child's interest in and enjoyment of worthwhile music. This explains the wide range as well as the diversity of music experiences planned for—the singing of songs, the reading of songs, rhythmic activities, listening to music, learning how music is written, creating music, and interpreting and integrating music in connection with other life activities.

Many varied situations are provided in which children may use their learnings in music. During the biennium there has been great progress in the several types of musical activities outlined in the curriculum, with special emphasis on festivals and other group endeavors. Likewise, there

This simulated orchestra played with piano during scene before the temple entrance in Egyptian Harvest Festival.

has been an increase in the number of schools providing adequate equipment, such as the phonograph, radio, piano, and the instruments of the orchestra or band.

Music education is attaining its rightful place in the school curriculum, and as a result of plans for a more adequate series of definite and integrated experiences in music, the number of children achieving success in this area of learning is increasing each year. To be able to sing well, to participate in instrumental music, and to understand and enjoy good music rendered by others is the right of every child, and success in contributing or in listening never fails to bring joy and satisfaction to the learner.

MATHEMATICS

The instructional program in mathematics will undergo changes in both the elementary school and the high school as a result of the twelve-year public school. The twelve-year program makes it possible to give a broader program in mathematics and at the same time to place increased emphasis upon those skills which all students need in order to adjust themselves properly to the quantitative side of life. Arithmetic will be emphasized in the eight years of the elementary school. The type of work formerly included in the seven-year elementary school will be given during the eight years of elementary school work under the new program, thus allowing more time for the acquisition of knowledge, skills and habits which should characterize pupils who have completed the work of the elementary school.

In the high school general mathematics will be offered in the ninth grade (a required subject), followed by algebra or general mathematics in the tenth grade, geometry in the eleventh grade or a coördinated course in plane and solid geometry, and advanced algebra, trigonometry and solid geometry in the twelfth grade.

War Implications

Since the United States entered the World War last December, representatives of the armed forces of the nation have called attention to the fact that young men drafted for military service were lacking in a knowledge of the fundamentals of arithmetic and other mathematical subjects. Accordingly, added emphasis will be given to arithmetic and also to algebra, geometry and trigonometry, especially for students in the tenth, eleventh and twelfth grades, as a part of their preparation for military service or work in war industries.

The attention of mathematics teachers has been called to a "War-time Program in Mathematics and Physics" and to other publications giving the essential elements in mathematics needed by young men who

The course in typewriting is the most popular business subject.

will enter the armed forces of the nation. Also, instructional materials showing the use of mathematics in military and industrial activities have been sent to all high schools.

BUSINESS EDUCATION

Interest in business education continues to grow. During the last biennium, courses in business education were introduced into a large number of schools. According to the preliminary reports submitted for the session 1941-42 there were 456 teachers of business education in the various high schools of the State. The courses taught by these teachers included stenography, typing, general business, commercial arithmetic, commercial geography, business law, salesmanship, business correspondence, and a few other minor topics. No commercial teachers were reported in five counties. The most of the teachers were employed in the larger city administrative units, though many rural schools also provide for business education.

The largest number of teachers employed in any one school was eight in New Hanover High School. At the other extreme was one rural school which employed a teacher who taught a course in commercial geography. In most schools the courses in business education usually include stenography, typewriting, and perhaps a year of general bookkeeping.

A plan is now under way to revise the State Course of Study in Business Education, Bulletin No. 187, to make it more helpful to the teachers of business education in the high schools.

INDUSTRIAL ARTS

Democratic citizenship involves active participation in the work and industrial pursuits of the community. Industrial Arts experiences can assist in the basic education of all school pupils by affording them opportunities to develop insights and skills necessary for intelligent understanding and appreciation of industrial forces. The development of this

area of education is essential for boys and girls irrespective of later vocational choice, because it provides opportunities for realistic studies and experiences involving common industrial materials, processes, products, occupations and interrelated socio-economic problems which so vitally influence individual and group well-being.

As a phase of general education it is a necessary foundation and background upon which later more specific vocational-industrial education can be built. Studies indicate that the exploratory and try-out opportunities provided by a functional Industrial Arts program vitally influence the efficiency and effectiveness of trade and industrial education courses on the vocational level.

The objectives of Industrial Arts are best achieved through shop and laboratory experiences involving a breadth of contacts with a wide variety of tools, materials, machines, films, books, trips and individual and group studies centered upon many aspects of modern life and industry. Because of the range of materials used, Industrial Arts offers splendid opportunities for creative expression and problem solving characteristic of the skilled craftsman, inventor, and technician. Industrial Arts experiences have important functions to perform in the development of an adequate program of public elementary, secondary, and adult education in North Carolina.

Industrial art experiences develop insights and skills and provides opportunities for creative expression.

VOCATIONAL EDUCATION

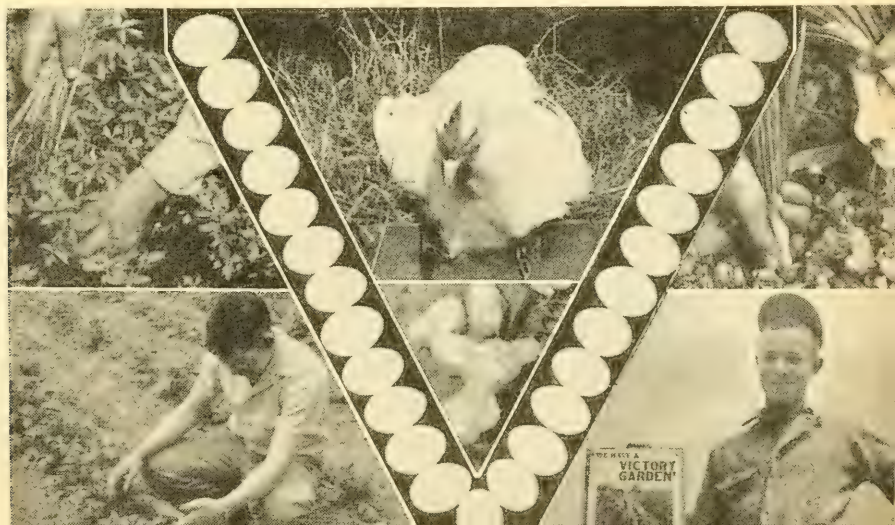

The World War has greatly accelerated the active interest of the people of North Carolina in the program of vocational education. The demands for persons with special training for definite contributions to the war effort have placed upon the Department of Agricultural Education, in addition to preparing boys and adults to become more efficient producers and rural dwellers, the responsibility for training out-of-school youth in several shop activities which will enable them to make a direct contribution to the war effort.

The Department of Trade and Industrial Education was given the added obligation to organize and direct a special program for training workers for the essential war industries.

The Department of Home Economics Education has been called upon to take the leadership in giving courses in the improvement of food habits, nutrition, conservation of foods and the better utilization of all materials of food and clothing in connection with the national emergency.

In the Department of Distributive Education emphasis has been radically shifted from teaching techniques of salesmanship so as to increase sales volume to teaching store workers how to meet situations which have arisen because of price ceilings and shortages, such as suggesting substitutes and keeping the customer in a good humor even when their requests are denied. This department has coöperated closely with the Office of Price Administration in an educational program relative to price controls, etc.

Students of vocational agriculture are a vital force in the war food production program.

Members of the vocational agriculture class repairing farm machinery.

The desire of youth to adjust their educational careers to the demands of the war, both on induction and in their civil life contributions, has greatly accentuated the interest of the public in the activities of the Department of Occupational Information and Guidance. The widespread utilization of the services of this department by the school people of the State has been very gratifying.

The greatly accelerated industrial activity within the State in the war industries has necessarily increased the number of industrial accidents, and has stepped up the demands for the vocational rehabilitation of handicapped persons. The growing shortage of labor has placed a great burden upon this department to train handicapped persons for efficient performance in industry. The above factors have resulted in more than doubling the number of handicapped persons rehabilitated in 1941-42, over the number rehabilitated during the first year of the biennium.

In addition to the regular programs of the Division of Vocational Education referred to above, the war training programs provided for by Federal appropriations have been made the responsibility of the Division. The reports of the several departments give more specific information. Also is included a report on the training program for out-of-school youth, the program of vocational training for war production workers, and the training program for NYA youth.

AGRICULTURE

Vocational Agriculture was formally introduced in the high schools of North Carolina under the Smith-Hughes Vocational Educational Act in 1917. Today there are 489 departments of vocational agriculture; 405 of these are located in white schools and 84 in Negro schools, with an enrollment of approximately 33,000 pupils for the school year 1941-42.

The program for vocational education in agriculture helps to round out more nearly our educational program, particularly in the rural schools where farmers constitute the major group. The ultimate objective is to train persons who have entered upon or who are preparing to enter upon the work of the farm for proficiency in specific farming occupations. More specifically, vocational agriculture is designed to prepare boys for the business of farming and for a happier and more useful life on the farm, to give farmers and farm boys training that will make them more efficient in their life work, and to make the country a better place in which to live.

Systematic class instruction is available to four groups of students:

1. Farm boys, fourteen years of age and above, who are regularly enrolled in high school. These are called all-day students.
2. Farm boys, who have stopped school and who feel the need of instruction and information on farming, may attend short courses of 20 or more lessons. This group is called part-time students.
3. Farmers and farm women, who want specific instruction on certain problems concerning the management of the farm and home, may attend short courses. The length of the course, the date and time of meetings can be arranged to suit the convenience of those attending. These classes are usually taught at night. This is the evening class group.
4. Farm boys who are enrolled in schools in the immediate vicinity of the school with a teacher of agriculture. The teacher of agriculture can arrange to meet groups of boys at these schools for one or more lessons a week where there is a demand for this type of work. This is the day-unit group.

Records show that approximately 65 per cent of the boys who have had one or more years instruction stay on the farm.

Teachers of agriculture coöperate from an educational standpoint with the program of the AAA, Land-Use Planning, Extension Service, State Department of Agriculture, Rural Electrification Authority, Farmers Coöperative Exchange, Food and Feed Program, and the Agricultural Workers Councils.

The work of a teacher of agriculture may be divide into three phases:

1. Classroom instruction for high school, evening class and out-of shool boys.
2. Community work.
3. Supervising the practical work of the students.

The Department of Agricultural Education has coöperated in the National Defense Program by offering courses in mechanical operations to out-of-school rural youth throughout the State. Instruction in the defense training classes is designed to prepare rural boys for vital positions in industry which will need millions of workers and for mechanical jobs on the farm. These training classes have put the teachers of agriculture on a 16-hour per day schedule.

Future Farmers of America

The Future Farmers of America organization is an integral part of the program of vocational agriculture. This is a National organization for students of vocational agriculture with active state associations located in 47 states, Hawaii and Puerto Rico.

North Carolina has the second largest membership in the National organization. Approximately 15,000 farm boys are members of the

Early Morning exercises—White Lake F.F.A. Camp.

EXPANSION OF VOCATIONAL AGRICULTURAL PROGRAM

Year	Number of Schools	Enrollment			Financial Returns on Supervised Projects
		All-day	Evening and Part-time	Total	
1918-19.....	29	323	-----	323	\$ 41,480.85
1919-20.....	44	721	-----	721	59,741.64
1924-25.....	105	2,943	2,350	5,293	600,477.03

1940-41.....	412	18,965	10,221	29,186	2,612,889.47
1941-42.....	489	20,856	9,139	29,995	2,374,505.85

400 local chapters located in the 96 counties where there are departments of vocational agriculture.

The F.F.A. is an intra-curricular activity having its origin and root in a definite part—vocational agriculture—of the school curriculum. Among other things, members learn through active participation how to conduct and take part in a public meeting, to speak in public, to buy and sell coöperatively, to solve their own problems, to finance themselves, and to assume civic responsibility. The foundation upon which the Future Farmers of America organization is built includes leadership and character development, sportsmanship, coöperation, service, thrift, scholarship, improved agriculture, organized recreation, citizenship and patriotism.

Some of the outstanding achievements during the past school year were as follows:

F.F.A. members coöperated with the Defense Program 100 per cent, purchasing a total of \$120,630.38 worth of Defense Bonds and Stamps, and collecting more than 6,000,000 pounds of scrap metal and large quantities of paper, rags, rubber and burlap bags. They increased the scope of the supervised practice program and managed more than 4,000 victory gardens.

A total of \$102,854.00 was derived from coöperative activities sponsored by 312 chapters to help finance local chapter activities.

F.F.A. members have a total investment of \$279,354.71 in land, livestock, farm equipment and tools.

Seven North Carolina boys were awarded the American Farmer Degree in 1941 and thirteen applications have been submitted for 1942. Sixty-five boys were awarded the Carolina Farmer Degree for 1942.

The following contests were sponsored: Supervised Practice, Star Farmer, Public Speaking, Livestock and Crops Judging, Food for Freedom, and Chapter Contest. These contests were conducted on local, Federation, district and State bases.

Fifteen thousand copies of *Tar Heel Talks*, the F.F.A. State publication, were mailed out at regular intervals.

The two State-wide F.F.A. camps operated for a period of nine weeks with a total attendance of more than 3,000 members for the 1942 season and approximately 350 boys at camp during each week of the season. The camp program consisted mainly of recreation and leadership training activities.

The motto of this organization consists of only four lines, but these lines are filled with practical philosophy reflecting a spirit and sincerity that shows the true viewpoint of farm youth, the "backbone of a nation." The motto is as follows:

LEARNING TO DO
DOING TO LEARN
EARNING TO LIVE
LIVING TO SERVE

THE NATIONAL DEFENSE TRAINING PROGRAM FOR OUT-OF-SCHOOL YOUTH

The Out-of-School Youth Defense Training Program provided training for out-of-school youth between the ages of 17 and 25 in order to create a reservoir of youth with preliminary training who might go into National Defense industrial employment as the occasion demanded, or who might be better qualified to serve agriculture as it becomes increasingly mechanized. These courses also were to function as devices of the selection and guidance of individuals into advanced or specific training courses. The Division of Vocational Education was charged with the responsibility for the conduct of the program. The local teacher of vocational agriculture was responsible for the program in the local community, in coöperation with the county superintendent, the principal, and the local advisory committee.

General preemployment OSY courses which offered basic instruction in Education were:

Courses in auto mechanics help train workers vitally needed for the war effort.

1. Auto Mechanics, consisting of the operation, care, and repair of tractors, trucks, and automobiles, including both gas and diesel engines.
2. Metal Work, including welding, tempering, drilling, shaping, with emphasis on farm machinery repair.
3. Woodworking, consisting of rough carpentry work in the construction of farm buildings and equipment.
4. Elementary Electricity, including operation, care and repair of electrical equipment, and wiring for light and power.

These courses operated for a total of 120 hours over a period of 8 weeks.

The following number of schools having vocational agriculture departments conducted one or more classes in OSY defense training:

Learning to care for children is important training today in homemaking courses.

		Per Ct.
White schools	311 out of a total of 405 departments, or	76.8
Negro schools	72 out of a total of 84 departments, or	85.7
Total	383 out of a total of 489 departments, or	78.5

Listed below is the total number of classes in each course, with the total enrollment:

	Classes	Enrollment
Auto Mechanics.....	409	4,317
Metal Work.....	506	6,578
Woodworking.....	362	4,706
Electricity.....	116	1,508
Total.....	1,393	18,109

A large number of these boys have found employment in defense industries and others have found local employment, taking the place of those who have gone into the armed services. Examples of the results of this training are the following: Fifty-nine of the 63 boys who completed the metal course in the Hillsboro school are now in defense industries along the Atlantic coast in shipbuilding and aeroplane construction; 75 boys out of 200 who attended classes held in the China Grove school are now in defense industries; 16 boys from the Franklin High School in Macon County are in the Glenn Martin aeroplane factory in Baltimore.

A total of \$501,546.28 has been spent in the State for equipment and instructional costs, \$242,463.55 of this amount being spent in providing additional equipment in the school shops. Funds for this program were made available by an act of Congress passed in June 1941.

HOME ECONOMICS EDUCATION

Conditions today challenge us to put forth every effort to safeguard the family and the home. With family life disrupted by men in the armed services and women working outside of the home in defense plants or in activities for civilian defense, it is imperative that we guard against neglect of small children and maladjustment of youth. Likewise, in these days of advancing cost of living, it is more than ever necessary to plan and buy wisely, to produce and conserve food, clothing and equipment, to prepare foods that insure strong healthy bodies, and to be prepared to care for the sick in the home. Home economics includes training in all these aspects of homemaking. Girls are learning to do their share. Through home practice and home projects they are applying this training in their daily living.

If we are to preserve our way of living in a democratic society more

Right—Good food makes strong bodies. Bottom—Renovation adds beauty and gives joy to the creator.

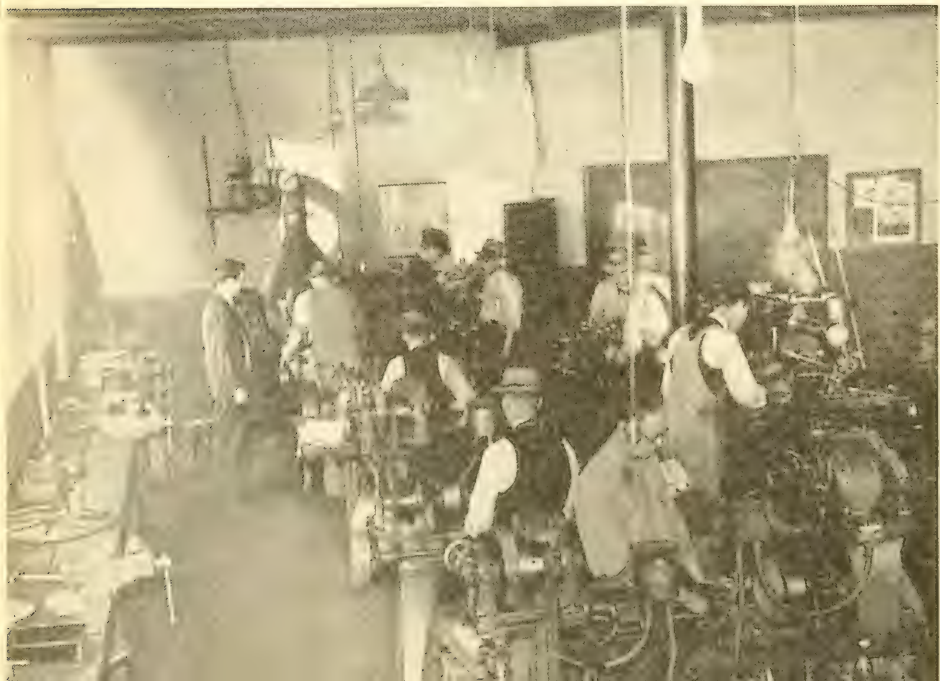

boys and girls must receive instruction in family living, so that they will be good family members today and good parents tomorrow.

Adults, also, asked for more training, and instruction was given in whatever area of homemaking the group felt a need. Nutrition and meal preparation, clothing construction, first aid and home care of the sick and child development classes were offered in many communities last year.

GROWTH IN VOCATIONAL HOME ECONOMICS EDUCATION

	Departments	Enrollment	Evening Classes	
			Number	Enrollment
1919-20	1	30	19	323
1924-25	0	0	31	4,522
1929-30	6	227	271	3,501
1931-32	34	1,667	277	5,596
1933-34	41	2,184	285	5,376
1935-36	113	6,737	318	6,707
1937-38	227	15,756	138	3,728
1939-40	280	20,891	161	4,718
1940-41	286	21,247	193	3,727
1941-42	359	25,808	251	4,812

Trade extension in machine shop.

In 1941-42 there were approximately 820 home economics departments in high schools of this State offering instruction to about 57,400 students. Of this number 359 departments were reimbursed from State and Federal vocational funds. The table on page 36 shows the growth in vocational home economics over a period of years.

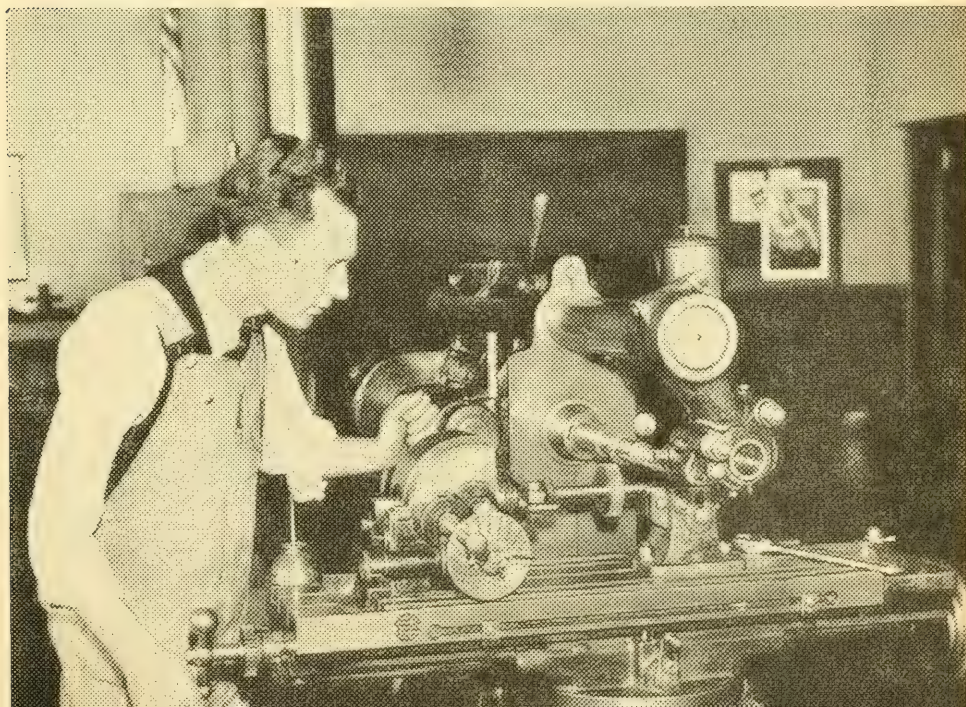

TRADE AND INDUSTRIAL EDUCATION

Trade and Industrial Education has continued its growth even though the National Defense Program has been carried on at the same time in many of the same shops under the supervision of trade and industrial education local directors. This is shown by the table appearing below.

Young people realize as never before that they must know how to do some particular job in order to secure the most advantageous employment; and adults employed have found it necessary to continue their technical training in order to secure promotion in industry.

Trade and industrial shop courses are offered in the high schools of fifty of the largest centers in the State. Training in diversified occupations, where students get their shop experience in industry on practical jobs and receive their technical information related to the job in school, is provided in thirty-eight centers with an enrollment of 1,017. This plan gives the student a chance to use the equipment in industry under

Learning to cut gear on a milling machine.

real working conditions. The school may offer opportunities in all the trades represented in the community, while industries get the best students selected for their particular use and these are given related training by the school, thus working to an advantage for all concerned. An enrollment of 11,215 employed workers were taught in 655 classes in technical subjects to become more efficient on their jobs and thus eligible for promotion.

GROWTH OF TRADE AND INDUSTRIAL EDUCATION IN NORTH CAROLINA		
Year	Number of Classes	Enrollment
1918-19.....	5	128
1919-20.....	73	806

1937-38.....	641	11,046
1939-40.....	714	11,582
1940-41.....	725	12,122
1941-42.....	798	14,366

VOCATIONAL TRAINING FOR WAR PRODUCTION WORKERS

When it became apparent in July, 1940, that special training would be necessary to furnish our expanding war industries with a sufficient number of trained workers, the vocational schools were called upon to furnish the training. The public schools of North Carolina which had suitable and sufficient equipment at that time immediately answered the call and began a training program which was very small at its beginning, but which has since grown in size, and effectiveness beyond that thought possible for this State. Funds for the operation of the program were provided by the Federal government under a Special Act of Congress.

In this program there are four different kinds of training offered: supplementary, pre-employment, training for supervisory personnel, and training for the military branches of our government. The supplementary training provides for upgrading workers already employed. The pre-employment training provides for specific training of new skills for a worker who desires to seek employment in a war production

industry. Training for supervisory personnel provides job instructor training, upgrading of supervisors, and in-service training of instructors. Training for the military branches provides training for Signal Corps workers and for men in uniform who need industrial skills.

There is being offered training in the following different skilled occupations:

Aircraft Woodworkers	Machine Tool Operators
Aircraft Metal Workers	Patternmaking
Aircraft Welders	Radio and Communication
Armature Winders	Sheet Metal Workers
Auto Mechanics	Ship Builders (Wood)
Blacksmith	Ship Fitters' Helpers
Blueprint Reading	Ship Welders, Electric
Garment and Textile Workers	Supervisor's Training

At the end of the present biennium there were 3,000 persons enrolled in 263 different sections.

There is no definite starting or stopping time for classes; students come into training every day and as they complete their training, they are referred to jobs in war production industries. With a complete turn-over of students about every eight weeks, 15,000 workers are being trained yearly.

The 250 instructors were recruited from industry. The main factor considered in their selection was that of work experience and standing in their trade. Each instructor ranks as a skilled worker in the subject which he teaches.

The major industries to which workers have been referred for placement are: N. C. Ship Building Co., Wilmington; Barlour Boot Works, New Bern; Elizabeth City Ship Yards, Elizabeth City; the Wright Automatic Machine Co., Durham; The Edwards Co., Sanford; The Glenn L. Martin Co., Baltimore; the Norfolk Navy Yard, Norfolk; and the Newport News Drydock and Ship Building Corp., Newport News.

EDUCATION FOR NYA YOUTH

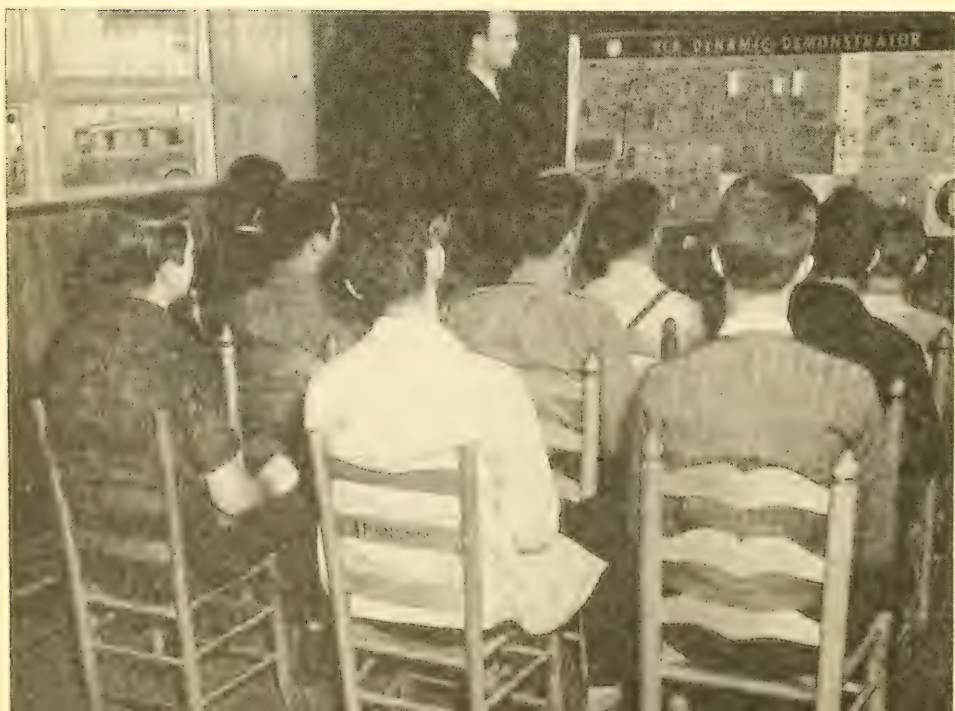

Under a coöperative agreement between the National Youth Administration and the U. S. Office of Education, educational facilities for NYA youth are provided by the public schools. The Division of Vocational Education is responsible for the administration and supervision of the NYA Educational Program. Contributing to NYA youth educational needs is the supervisory staff of the several departments of vocational education: Trades and Industries, Home Economics, Agriculture, Occupational Information and Guidance, and Distributive Education.

As this coöperative plan operates, the State Director of Vocational Education and NYA representatives confer on (1) the program of work projects, (2) the nature of the instruction to be given and (3) conditions under which instruction will be offered. As a result, the total resources of the National Youth Administration and the State Department of Public Instruction are available for work experience and training for NYA youth.

Training is provided in two types of work projects: resident and non-resident. Full-time instructors are provided by the schools in resident centers and for nonresident projects. NYA youth are paid for work production on NYA projects but attend classes on their own time. Three types of training are provided in this program: (1) Extension Training Supplementary to Work Experience, (2) Preparatory Training for Occupational Adjustment, and (3) Instruction for Civic and Vocational Intelligence.

Under Federal legislation the program of NYA Education, supported by appropriations included under Public Law 146, was discontinued. Beginning with the fiscal year July 1, 1942, the training programs for NYA youth will be included in Vocational Training for War Production Workers, Program No. 1, provided for in Public Law 647. (See p. 38.) Therefore, specific vocational courses intended to prepare NYA youth

NYA out-of-school youth learning radio.

in the shortest time possible for filling war-time jobs are now offered by the public schools.

TOTAL NYA OUT-OF-SCHOOL YOUTH ENROLLMENT IN CLASSES—AGES 17-25

Year	Resident		Non-Resident		Grand Total
	No. Centers	Total Enrollment	No. Centers	Total Enrollment	
1940-41-----	17	2,667	430	7,842	10,509
*1941-42-----	12	1,520	132	2,640	4,160

* This reduction was due to a tremendous cut in NYA funds.

DISTRIBUTIVE EDUCATION

Distributive Education is a vocational program designed to prepare young workers for distributive occupations and to train regularly employed workers in retail and wholesale organizations to the end that our system of distributing merchandise may become more efficient.

Through this program specific vocational training is given in the senior year for students entering retail merchandising as a career. Work experience with pay is provided throughout the year. During the school year 1941-42, 318 student workers earned \$56,108.98. At the end of the year 95 per cent were offered permanent employment.

COOPERATIVE PART-TIME VOCATIONAL TRAINING FOR YOUNG WORKERS

Year	No. Classes	No. Persons	Earnings
1939-40-----	1	25	\$-----
1940-41-----	7	182	-----
1941-42-----	15	318	56,108.93

Through the in-service or extension programs for regularly employed workers, training is given for managers, junior executives, and employees in all phases of merchandising. During the past two years this program has of necessity been adapted to aid merchants in meeting problems arising from an overnight change in the national economy to meet war-time conditions. To meet problems arising from these changes the following types of programs have been developed.

Program A. *War-time Emergency Training for New Store Workers*, which is part-time preemployment replacement training to provide trained workers to replace those who have entered military service or who have gone into defense industries.

Program B. *Special War-time Training for Experienced Salespersons* to familiarize them with the war regulations and adjustments affecting the sale of merchandise and the service of stores.

Program C. *War-time Training Program for Owners and Managers of Distributive Businesses* to give an understanding of the laws, regulations, orders, and control under which retail businesses must operate during the war emergency.

Program D. *A Training Program for Store Supervisors and Department Heads* to assist them in the induction and in-service training of the large number of new persons who will enter retailing as replace-

IN-SERVICE TRAINING FOR ADULT WORKERS

ments and to train experienced salespersons to serve customers in a war-time period.

REHABILITATION

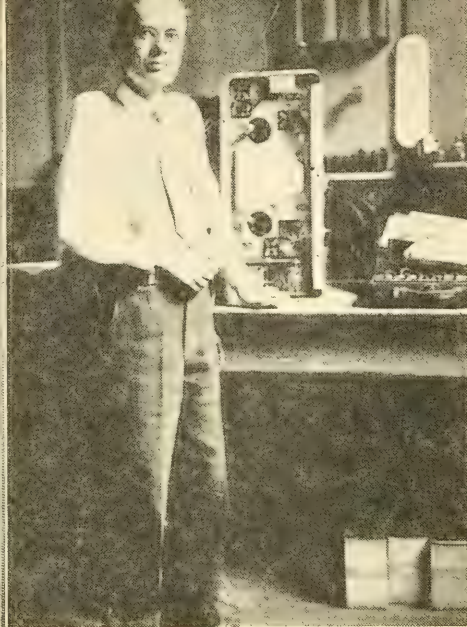

The Rehabilitation Program provides or secures vocational guidance, appliances, treatment, training and placement for physically impaired individuals 16 years old and over who are vocationally handicapped.

When a person has been given part or all of the above services to the extent that it has resulted in his having a permanent job with a self-supporting wage, he is considered rehabilitated.

This Program has advanced from a low of 18 rehabilitations in 1912 at an average cost of \$647.08 per person to a total of 844 in 1942 at an average cost of \$208.32 per person. It is therefore evident that it costs less to rehabilitate a person for life than it does to maintain him at public expense for twelve months.

This Department is now engaged in getting as many physically impaired persons as possible into defense training classes and in training them in essential war industries.

This machine age and the ever increasing toll of injured in employment, because of the unprecedented demands of industry in the war effort, provide a steady stream of persons needing this service. Under the Social Security Act, Vocational Rehabilitation is permanent and continuing. Recent amendments to this Act make available \$3,500,000 annually in Federal funds to the states for this work. There is every reason to believe that this amount will be increased substantially because of the tremendously increasing need for these services.

Left: W. T. has to walk on his knees, since he came to the Department too late in life for corrective treatment. He was trained as a watchmaker by the Rehabilitation Department, and now operates his own watch repair shop and jewelry store from which he makes a comfortable living for his family. Right: Billy was for years a wheel chair case. After a series of orthopaedic operative procedures, he was able to walk and was trained as a radio mechanic by the Rehabilitation Department of the Division of Vocational Education. He now owns his own radio repair business in which he has trained several handicapped persons.

OCCUPATIONAL INFORMATION AND GUIDANCE

An Occupational Information and Guidance Service was set up in the State Department of Public Instruction July 1, 1939. The primary purpose of this service is to assist schools in the development of better guidance programs. During the past three years field work has been carried on in all but two or three of the 100 counties. County-wide conferences on guidance have been held in 84 counties and some services have been extended to most of the city units. Some of the more specific functions and purposes of the guidance service are:

1. To prepare and distribute special bulletins dealing with plans, courses of study, and literature on studies, investigations, and surveys in the field of occupational information and guidance.
2. To aid in initiating a guidance program in schools previously doing little work in this field.
3. To assist in evaluating the program in schools already doing considerable guidance work, and to offer suggestions for expansion.
4. To meet upon invitation with educational or civic groups for the purpose of discussing general problems and phases of guidance.
5. To coöperate with other agencies interested in the broad aspects

The guidance program assists the individual in securing and interpreting occupational information which is essential in making sound vocational choices.

of various youth problems such as the State and National Vocational Guidance Associations, civic clubs, employer and labor groups, the Occupational Information and Guidance Service in the U. S. Office of Education, and The North Carolina Education Association.

6. To promote the training of teacher-counselors in occupational information and guidance, and to advise with teacher trainers on all matters pertaining to the improvement of the program in the State.
7. To conduct, in coöperation with local authorities, group conferences for the purpose of improving local programs of guidance.
8. To answer by correspondence requests from schools and other interested agencies for sources of occupational and guidance information.

A functional guidance program includes certain definite services which should be available for each pupil in all schools regardless of size. The important areas of a guidance program are: (1) an individual inventory, (2) a study of local, regional and national occupational information, (3) an exploration of additional and further training opportunities, (4) counseling, (5) placement, and (6) follow-up of all school-leavers. A guidance program should also reveal facts which point to needed changes in the curriculum.

What kind of guidance programs are to be found in North Carolina high schools? The 1942 final report submitted by each high school principal includes, for the first time, a section pertaining to guidance. A summary of 927 of these reports reveals evidences of guidance programs as indicated by the per cent of schools having or engaging in the following: Individual cumulative record folders 58.8 per cent; standard achievement tests at regular intervals 27.8 per cent; file for occupational information 38.1 per cent; file on further training opportunities 25.4 per cent; regular course in occupations 15.3 per cent; individual counseling about educational and vocational plans 55.3 per cent; assistance in placing all pupils in next steps 43.5 per cent; and follow-up of all graduates and dropouts 38.4 per cent.

In addition 552, or 56.3 per cent, of the 927 high schools reported that someone had definitely been placed in charge of the guidance program. Three hundred and six schools, or 37.2 per cent, indicated that one or more staff members were assigned to do individual counseling. For these schools 3.8 hours per week had been included in the regular schedule for individual counseling.

SCHOOL LIBRARIES

The realization that school libraries are essential in a good program of instruction is demonstrated by their growth in this State during the past decade. The growth in the elementary schools has been especially significant. From a program of purely recreational reading of more or less unscientifically selected books to a program of directed recreational and informational reading of carefully selected and graded books related to individual and class interests shows the growing philosophy which makes elementary school libraries actively used every day. The emphasis in the high school has likewise changed from the library used primarily by the English department to the library used by every subject group in the school. This growth cannot be shown by any statistical table, but visits to school libraries and an examination of book orders would readily make it apparent. Statistics can show, however, that marked growth has taken place. An over-all view of school libraries can be obtained by a study of the table, "General Statistics on Public School Libraries." The information in this table is based on reports received from schools which operate school libraries and does not include small schools or others which do not have library book collections. In 1930-31 only 36 per cent of the children enrolled attended schools operating school libraries. Ten years later in 1940-41, 81 per cent of the children were enrolled in schools providing library service.

High school students seek information on current problems and find satisfaction through library materials.

* Figures not available.

Much of this development is attributable to the more than 600 school librarians and to the activities of the PWA Library Project which supplied library clerks to approximately 800 schools and gave supervision

Display of books and information related to democratic living stimulate greater concern for the American way of life.

by trained librarians to them. The library assistance from WPA terminated with the closing of schools in 1942. Students on NYA projects numbering more than 400 assisted in the library program under the direction of the librarian, as did fully 3,000 pupils who gave their services because of their interest in the library. Student assistants in many schools have organized as clubs and are promoting the formation of a State organization of student library assistants. The trained librarians have been handicapped in the promotion of the library by numerous other activities assigned to them and by the limited time that many of them have assigned for library work with the boys and girls and for technical library organization. The number of teacher-librarians with some library training as shown in the table below includes those nominally responsible for the library but not assigned any school time for carrying on the work. The remarkable increase in trained personnel in Negro schools has largely been made possible through the coöperation of the North Carolina College for Negroes in establishing a school of library science there. Training to meet certification requirements for teacher-librarians in white schools is provided at Appalachian State Teachers College, East Carolina Teachers College, Woman's College, and the University of North Carolina. The University also offers a full year of library training to meet certification requirements for full-time librarians. At the beginning of the session 1942-43 Appalachian State Teachers College institutes a program of twenty-four semester hours in library science for the training of full-time school librarians.

* Figures not available.

There is a noticeable ratio between book circulation and the number of books available. The table on the "Number of Library Books Owned" is based on the total ownership in all schools of the State as shown on the

superintendent's general report. The number of volumes per pupil is based on average daily membership. The figures in the table on "Circulation of School Library Books" were taken from the annual library reports submitted by individual schools reporting school libraries.

NUMBER OF LIBRARY BOOKS OWNED

Year	Total Volumes	Volumes Per Pupil A.D.M.
1924-25	590,273	.7

1941-42	8,195,864	911,615	9,107,479	12.68

Negro schools are fast developing libraries of well-selected books suited to the needs and interests of the pupils.

The increased expenditures also reflect the interest in the library and the need for books in good teaching situations. These figures are tabulated from the annual library reports of individual schools. As books are used they tend to wear out; other materials become out-of-date and need to be discarded. These two reasons explain the present annual figure of approximately 75,000 books lost and discarded each year. The average replacement cost for elementary school library books is 90c per book; the average replacement cost for high school library books is \$1.40 per book. It takes approximately \$90,000 a year to maintain the libraries at their present standard without increasing the number of books available. The cost of library supplies for organization, cataloguing, mending, and circulation amounts to about \$45,000 a year, or an average of about 20c per book added to the library collection. During the past biennium approximately \$50,000 each year was available from State funds for school library maintenance purposes, including book replacements, magazines, mending and binding, and consumable supplies.

EXPENDITURES FOR SCHOOL LIBRARIES

Year	White	Negro	Total Expenditures	Average Per Pupil
1929-30	\$ -----	\$ -----	\$ 128,441.55	\$.32
1931-32	70,190.50	10,219.82	80,410.32	.16

1941-42	277,725.30	42,561.33	320,286.63	.45

Attractive arrangement of books helps boys and girls to develop discriminating reading tastes.

There is no level in the school program from the first year through the twelfth year where libraries are not needed and used. There is no subject from the A of art through the M of music and mathematics on through the Z of zoology where books and libraries are not needed and used. Libraries hold inherently knowledge for today and continuing education for tomorrow.

School Libraries in the War Effort

School libraries have participated actively in the war program by making currently significant material readily available; by stimulating interest in war information through displays; and by engaging in salvage campaigns, first aid classes, the Victory Book Campaign, and other programs. The librarians themselves have in many instances headed the school campaign program and the libraries have served as clearing places.

A well informed community is an intelligent community. The library's chief contribution is through making significant material available and through stimulating its use. The State Department of Public Instruction sent to more than 500 school librarians suggestions for materials and displays on war participation topics, including Civilian Protection, Consumer Education, Nutrition and Health, Safety and First Aid, Defense Bonds and Stamps, Industrial Training with emphasis on defense job training, Latin America, Countries Engaged in War, Social and Economic Planning, Armed Services, and Democracy. Reports from the school librarians indicate that practically all of them had displays on three or more of these topics. Some emphasized each topic with gratifying circulation of the books and pamphlets displayed. The displays usually consisted of bulletin board material and books related to the

Our world neighbors are brought nearer by library book displays.

topics. In some schools a table was reserved for the display of books and pamphlets on the topic promoted during the week. Marked interest was shown by pupils, and many teachers featured the information in their classes.

Bibliographies of material available locally on the topics above and on related topics were prepared by librarians for use in class discussions and school club work. Printed bibliographies from the United States Office of Education, from the American Library Association, and other national agencies on Industrial Training, Shop Work, Aeronautics Education, Latin America, China, Canada, and other similar topics have been made available to schools. Similar bibliographies to meet needs of a specific school or reading level have been prepared by the State School Library Adviser in the State Department of Public Instruction.

The school libraries were particularly active in the Victory Book Campaign to supply additional books for USO Clubs, Camp Day Rooms, and to armed forces being transported by trains and ships. The libraries served as receiving centers and the librarians assisted in sorting the books preparatory for shipment to designated dispensing points.

In many localities the school library room has been used for first aid classes, for ration centers, and for paper salvage centers. The librarians have participated in the campaigns and in some instances have directed certain of them. Certainly the boys and girls have been more conscious of the significance of the programs as a result of the school library participation.

ADULT EDUCATION

In 1937 the Legislature authorized the State Board of Education "to provide rules and regulations for establishing and conducting schools to teach adults." The Act further provided that said schools should "become a part of the public school system of the State and . . . be conducted under the supervision of the State Superintendent of Public Instruction." In accordance with this Act a State program of adult education was set up with the following governing principles as basic regulations:

1. Teachers shall be elected by the board of education in each administrative unit on recommendation of the superintendent.
2. Teachers must hold regular North Carolina teachers' certificates, exceptions to these qualifications to be made only in cases of demonstrated ability in the field of adult education.
3. Adult education teachers shall be paid according to the State standard salary schedule in accordance with the certificate held.

The State will pay 50 per cent of the salary; the other half must be paid from local funds set up in the school budget.

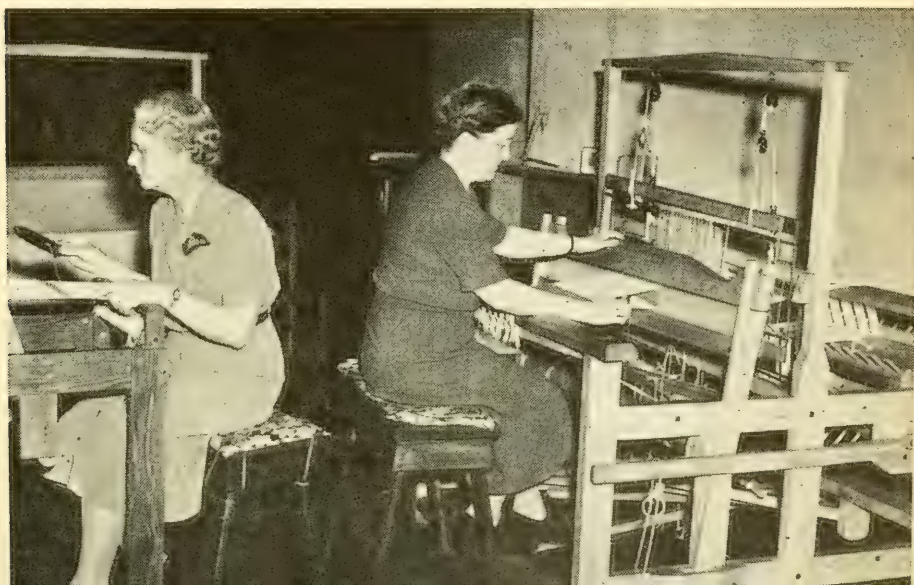

4. No uniform curriculum is to be prescribed. The program shall be democratic in its attempt to meet the varying needs of individuals and communities. The type of instruction to be offered in any community can best be determined by the school superintendent with the aid of local community school councils.
5. The administration of the program shall be left almost entirely with superintendents. Assistance in organizing and directing the work of the teachers will be provided from the State office.

During the last two years the following 31 school administrative units have conducted adult education programs:

Asheville, Buncombe County, Burke County, Catawba County, Cleveland County, Charlotte, Dare County, Durham, Durham County, Forsyth County, Gastonia, Gaston County, Graham County, Greensboro, Guilford County, High Point, Kannapolis, Kinston, Leaksville, Mecklenburg County, Mitchell County, Moore County, Richmond County, Robeson County, Rowan County, Salisbury, Rutherford County, Surry County, Swain County, Winston-Salem, Wilmington.

While Adult Education in North Carolina is basically a literacy movement, the war naturally had its effect on courses and subjects taught. In addition to the regular literacy program, courses in first aid, practical and home nursing, and nutrition were offered to hundreds of adults anxious to meet war-time requirements for civilians. Homemaking and parent education were very popular. Some school units supplemented the program further by offering work in crafts, citizenship and public affairs, dramatics, gardening, music, public speaking, parlia-

Craftsmanship in industrial occupation brings personal satisfaction and material gain to many adults.

mentary procedure, and business education. Through short courses many persons were given the training necessary for employment created by the emergency. In some instances young men eligible for the Service asked for refresher courses in science and mathematics prior to their induction. Three units are now, 1941-42, offering high school subjects to adults who desire to graduate and thus better qualify for military service or for employment. As a means of noting the rapid growth of the program, the accompanying table is presented.

GROWTH OF ADULT EDUCATION		
Year	Number Teachers	Number Students
1937-38	97	4,044
1938-39	89	6,074
1939-40	106	6,926
1940-41	101	7,573
1941-42	125	11,227

Not included in these figures are the many persons who last year participated in public forums. Since 1939 North Carolina has offered financial assistance to school administrative units desiring to organize and conduct public forum programs. The Division of Adult Education releases these funds to school units on a fifty-fifty matching basis and will permit any school unit to secure as much as fifty dollars of State funds. The technical organization of the forum in a unit is done by a

Nursery schools provide opportunity for developing healthy, happy, and socially adjusted citizens.

representative of the North Carolina Public Forum Office which is a branch of the University Extension Division. A plan has been worked out whereby the Forum Office sends trained and competent discussion leaders, together with materials, anywhere in the State at the standard charge of twelve dollars per visit. Under this plan units having a hundred dollar budget may put on eight forum sessions and spend four dollars for supplies, or a program half this size could be conducted on a fifty-dollar budget.

The entrance of the United States in the war stimulated interest in public discussion. Topics, such as Emergency Powers and Private Rights, American and British Relations, Consumer Purchasing and Problems of Family Finance, Maintaining Civilian Morale, Is Isolation Possible?, and many others related to the emergency, were discussed by over a hundred organized forum groups. Interest in this particular phase of adult education is growing very rapidly.

During the 1941-42 year Union County conducted a unique experiment in forum organization. The principals in the school system, with the aid of a representative from the State Forum Office, first studied the art of conducting a public forum. Having acquired the method, each principal then agreed to study and become well-informed on one current topic and to lead a discussion on that topic in each of the other school communities in the county. As a result of the project, three thousand adults had the experience of learning coöperatively, lay leadership was recognized and developed in communities, and community interest in public affairs was strengthened.

Adult education classes encourage interest in world affairs and help develop ability for intelligent participation.

* Special reports from high school principals for the session 1941-42 show that the full extent of the program in health and physical education is not revealed by the regular H. S. Principal's Annual Report. The figures are:
Number students given medical examination.....39,741

Number enrolled in health and safety:

Nutrition.....37,597
First aid.....43,311
Control of communicable diseases.....26,092
Safety.....37,088

Number enrolled in physical education.....90,509

HOW THE SCHOOLS OPERATE

ADMINISTRATIVE AGENCIES

State Agencies. The public schools of North Carolina operate in the main under the direction of five State agencies :

- The State Board of Education
- The State Board for Vocational Education
- The State Textbook Commission
- The State School Commission
- The State Board of Health

The first four agencies listed devote their time and energies to the public schools exclusively. They are each independent, with special defined duties outlined by legislative enactment under constitutional authority. In addition to these agencies, the State Board of Commercial Education has been established and empowered to regulate the business schools and colleges of the State.

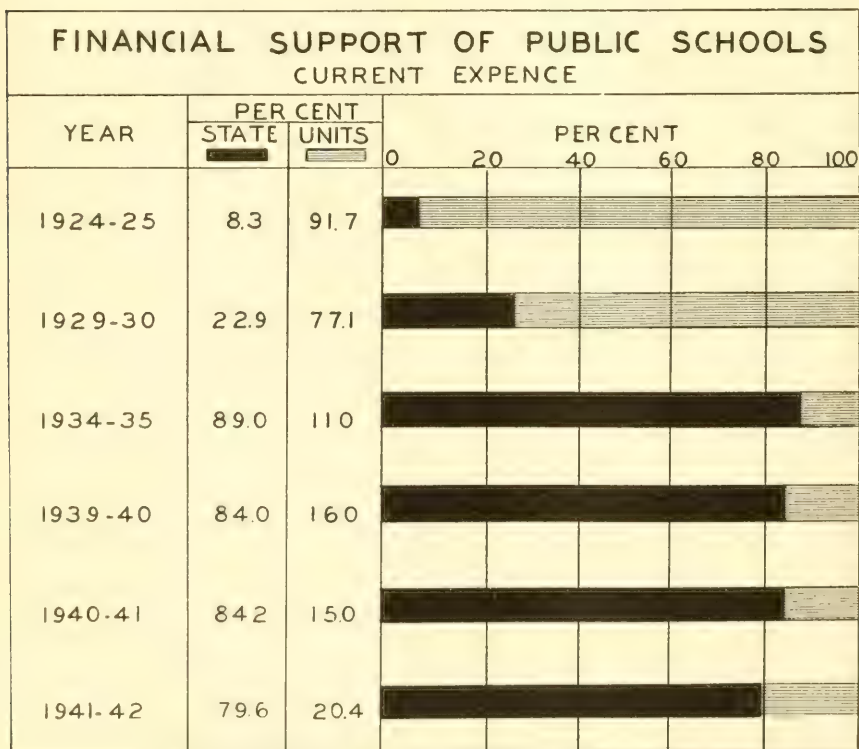

The latter agency is concerned largely with health in general, but under an arrangement with the Rockefeller Foundation a Division of School-Health Coördinating Service has been established jointly by the State Board of Health and the State Superintendent of Public Instruction with a view to further improving health teaching in the public schools. Then, too, the State Board of Health, through its Divisions of Oral Hygiene and Sanitary Engineering, has been working with and through the schools with the aim of improving the general health and sanitary conditions of the public schools.

Each of the above-named agencies maintains an office staff with offices in Raleigh. The administration of the rules and regulations of the State Board of Education, however, together with necessary duties devolving upon the State Superintendent by virtue of his office as an elected State official, is carried on through the Department of Public Instruction. The State Board of Education is composed of the following seven elected officials: the Governor, the Lieutenant Governor, the Secretary of State, the Treasurer, the Auditor, the Attorney General, and the Superintendent of Public Instruction as secretary.

The State Superintendent of Public Instruction, in accordance with law, is authorized to "direct the operations of the public schools and enforce the laws and regulations in relation thereto." (Sec. 5392, Consolidated Statutes.) Subsequent legislation, however, has transferred certain specific duties formerly performed by the Superintendent to other

State school agencies. The Superintendent is represented on these other agencies, as vice chairman of the State School Commission and as chairman of both the State Board for Vocational Education and the State Textbook Commission. These two latter organizations plus the staff employed by the Superintendent operate as the Department of Public Instruction.

Local agencies. The local administration of the public schools is through county and city administrative units. The governing authority in each of the 100 county units is known as the county board of education. These boards usually consist of three or five members, but in certain cases, according to special legislation, there are more than five members on the board. Board members are nominated biennially in the party primaries or conventions and are appointed for terms of two, four, and six years by the General Assembly. The executive officer of the county board is the county superintendent, who is appointed by the board for a term of two years, subject to the approval of the State School Commission and the State Superintendent of Public Instruction. The county

board, with the advice of the county superintendent, appoints the local committees for the school districts.

The governing authority of each of the 70 city units is styled "board of trustees." Membership on these boards is governed by the laws creating the charter districts, the name by which these units were formerly known. The administration of the schools in these districts is similar to that in county units.

In both county and city units there is a tax levying body which is responsible for the provision of all funds other than those which are obtained from the State. The county commissioners have this responsibility in county units, whereas in city units the city commissioners provide the funds by taxation or otherwise for any school support beyond that provided by the State and county.

SOURCES OF FUNDS

The State, through its law-making body, assumes the cost of operating the eight months school term on certain standards of cost. The local units as a whole or certain districts within local units are responsible for financing any school costs for the eight months' term not included in the State budget and in addition the *total* cost of any school facilities provided beyond an eight months' term.

The State funds are administered by the State School Commission and are appropriated for certain specified objects of expenditure classified as current expense. Local funds—county, city and district—may be used for supplementing State funds as well as for capital outlay and debt service obligations. The Report of the State School Commission gives the basis for the allotment of State funds to the county and city units.

The accompanying table gives the expenditure for certain selected years for current expense objects. Other tables present figures showing expenditures by items from State funds for the two years of the biennium ending June 30, 1942, and the total expenditures from all funds for each of the past four years.

Current Expense. As the following table shows, the recent trend in expenditures for the current operation of the public schools has been improved. The total current expense, estimated for 1941-42, was \$36,117,127.23, an average estimated expenditure of \$46.27 per pupil in average daily attendance.

CURRENT EXPENSE						
Year	State*	Local	Total	% State*	A.D.A.	Average Per Pupil

* Includes Federal funds.
† Estimated.

Capital Outlay. School expenditures for buildings and equipment are the obligation of the local units. These units have borrowed money from the State Special Building Fund and the State Literary Fund with which to erect and equip buildings, but this money must be paid back with interest.

As the table below shows, capital outlay expenditures vary from year to year, depending upon the need as well as the ability of the various units in financing building programs. The funds provided by the State greatly stimulated these expenditures since they provided a source for borrowing money without the necessity of the unit having to vote bonds. During the period from 1922 to 1928 the State provided nearly \$18,000,000 in Special Building Funds for capital outlay purposes. The decrease in these expenditures following this period was due to the exhaustion of these State funds and the financial condition of the world. Following this period of low expenditures, as indicated by the table, the expenditures for school plants increased to around four or five million dollars. This increase was made possible by the use of Federal funds.

Payments for debt service obligations represent the repayment of State loans, principal and interest, and the retirement of bonds issued. This money is realized in the main from the taxes levied in the units for this specific purpose. The accompanying tables gives the amounts paid out for capital outlay, divided as to race, and for the retirement of debt service obligations for the years indicated.

Note: In addition, the State deposited in the administrative unit accounts \$26,083.01 which was unused and will be refunded for use in 1942-43. Unallotted equipment expenditures at June 30, 1942 were \$171,777.55.

THE PHYSICAL EQUIPMENT

School Plants

Since it is no longer possible to secure Federal aid for school plant purposes, except in war activity areas, the State Literary Loan Fund has continued to increase in popularity as a source for borrowing funds for school buildings. Applications for loans exceed the amount of money available from this convenient source for financing school building construction. While it is also no longer possible to make loans from any of the Special Building Funds, money from prepayments on these funds was available during the first year of the biennium. Loans from the Rural Rehabilitation Corporation Fund also have been most helpful in the financing of vocational educational buildings. Funds for financing the larger buildings have been obtained from bond issues, the interest rate on which has been unprecedentedly low.

In order that present school plants and those to be constructed in the future may be less subject to destruction by fires, which annually jeopardize the lives of many children and patrons and which are responsible for large property losses and much disruption of the educational programs, studies have been made in an attempt to discover the causes of the more serious school fires. An analysis was made of the fires that occurred during the five-year period from 1935 to 1940. Fires destroying property of considerable value occurred in 12 of the 70 city units during this period. Sixteen of the 100 county units had fires destroying valuable buildings.

An attractive building well-located and properly landscaped is a community asset.

The other fires occurring in the State were minor in nature and many of the buildings involved were small, antiquated structures, some of which were not in use. While analysis fails to reveal any specific cause responsible for school fires, the evidence seems to point toward defects in the original construction. Buildings planned and supervised by registered architects and constructed by registered engineers were the valuable ones destroyed.

The appraised value of school property in North Carolina for certain selected years from 1919-20 to 1940-41 indicates something of the accomplishments that have been made in the field of school plant construction during the past two decades. The average school property value per child enrolled indicates on a pupil-value basis the availability and type of school plant facilities in the State.

APPRAISED VALUE OF SCHOOL PROPERTY

Year	White	Negro	Total
1919-20	\$ 21,670,514	\$ 2,387,324	\$ 24,057,838
1924-25	63,434,665	7,271,170	70,705,835
1929-30	98,946,273	11,475,042	110,421,315
1931-32	99,383,659	11,742,421	111,126,080
1933-34	94,910,579	12,170,324	107,080,903
1935-36	97,823,361	12,502,132	110,325,493
1937-38	99,792,252	13,887,392	113,679,644
1939-40	103,724,982	15,154,892	118,879,874
1940-41	105,658,494	15,580,743	121,239,237

VALUE PER PUPIL ENROLLED

Year	White	Negro	Total
1919-20	\$ 45.32	\$ 11.20	\$ 34.80
1924-25	113.40	29.03	87.31
1925-30	162.92	44.20	127.37
1931-32	165.63	44.22	128.35
1933-34	154.38	43.35	119.57
1935-36	159.14	46.27	124.13
1937-38	162.64	51.76	128.91
1939-40	167.36	55.93	133.46
1940-41	171.30	57.42	136.51

In the matter of appraised value of school property per pupil enrolled among the several states, North Carolina does not compare so favorably. This is due in a large measure to the low value of school property used by Negroes. The preliminary statistics for 1939-40 for a selected number of states and the average for the nation are as follows:

U. S. Average.....	\$300	Missouri	251
New York (highest) ..	526	Florida	228
Connecticut	433	West Virginia.....	187
Maryland	301	Virginia	\$156

The transportation problem for hundreds of students has been solved by the use of bicycles.

North Carolina.....	134	Georgia	109
Kentucky	124	Alabama	84
South Carolina.....	110	Tennessee (lowest).....	80

War Effects

During the first 18 months of the biennium school plant construction proceeded satisfactorily and normally; a number of modern plants were under construction. The advent of the war, however, caused a virtual cessation in normal building activity. The construction of buildings in new centers is no longer encouraged, and much of the school building effort is directed toward replacements of burned or condemned structures. Small auxiliary buildings and additional rooms are also being provided. Increased emphasis is being placed upon maintenance, beautification and repair programs. The maintenance of the *status quo* in school plant facilities is one of the prime objectives during the war period.

The establishment of a number of military centers and other activities related to the war have caused a disruption of the educational programs in several school units of the State. The Federal Government has sought to relieve the affected communities of undue hardships caused by these emergency conditions by making substantial grants for new buildings, maintenance and operation, and transportation. Wilmington, the location of a large ship building enterprise, has received contributions in the amount of \$614,000; grants totaling \$167,000.00 have been made to Fayetteville to provide for children who have moved into this area because of the expansion of Fort Bragg; and Onslow County, site of the Marine Barracks, will receive valuable aid, approximately \$300,000.00. Craven County, New Bern, Carteret County and a few other units are being considered for assistance as a result of military activities.

In anticipation of postwar building programs, surveys of needs are

being conducted and information on important building needs is being assembled in order to avoid the necessity for hastily prepared plans once normal building operations are resumed.

SCHOOL TRANSPORTATION

The public transportation of school children is necessary for the establishment of large school districts with large size buildings. The growth in this phase of public education in North Carolina, therefore, has paralleled that of the increase of large modern school buildings in rural and small town areas.

Prior to 1919-20 there was very little school transportation at public expense. Compared with the great network of transportation routes throughout the State today, even the record of 150 vehicles transporting fewer than 8,000 pupils during 1919-20 appears very small indeed. From that small beginning, as the table shows, the transportation system has expanded under local efforts and support to the year 1932-33 and after that year at State expense until in 1940-41 there were 4,727 buses engaged in hauling 341,135 pupils to and from school each day. The total annual cost of this program of public school transportation was \$2,631,679.76. On the basis of the number of pupils transported the annual cost was \$7.71 per pupil, or, based upon a school term of 160 days, 5 cents per pupil per day for the trip to school and return home.

More girl drivers are being used now since boys are taken into the service.

PUBLIC SCHOOL TRANSPORTATION

Year	Schools Served	No. of Vehicles	No. of Pupils	Operation Cost	Per Pupil Cost

1941-42 †	1,290	4,823	344,648	2,190,822.32	6.30

* Information not available. † Estimated.

North Carolina's transportation system is the greatest in the world. No state exceeds this State in the number of pupils transported to school. For a more extended treatise of this subject, the reader is referred to the Report of the State School Commission, which body under the law has "authority to promulgate rules and regulations governing the organization, maintenance, and operation of the school transportation facilities."

TEXTBOOKS

The purchasing and distribution of textbooks for the schools have been established by law as the duties of the State Textbook Commission. The activities of this Commission may be indicated in part by the statistical data presented in this section. As these figures show, the work has changed from year to year, with gradual increases in all departments. During the last year of the biennium, the Textbook Commission has been called on to make a number of changes in policy in order to provide textbooks for the Defense and War Training Programs.

These figures do not measure the educational use of textbooks; they present the picture of "quantity" and "volume" and thus help to portray the effect of the textbook program on the total school situation.

Books Purchased by Pupils. When the Textbook Commission began its activities in 1935-36, pupils were given an opportunity either to buy or to rent their books. At first, sales were large, but after the first two years they diminished very rapidly. As the pupils became acquainted with the rental system, they shifted almost unanimously from the practice of buying books to the use of the rental system.

VALUE OF BOOKS SOLD TO PUPILS

Year	Value
1935-36	\$ 59,644.45
1936-37	80,858.36
1937-38	14,856.51
1938-39	8,436.73
1939-40	5,876.31
1940-41	4,173.17
1941-42	4,175.41

Books Rented. When the rental system was started in 1935-36, most of the pupils in the State owned some books. As these books gradually wore out, the pupils rented more books. Since 1937 the basal elementary books have been free, but at present most of the high school pupils of the State are renting all of their books. This means that the rental fees collected in the future years will not increase as rapidly as they did in the past, but will gradually reach a maximum figure and become more stabilized.

The renting of supplementary readers increased rapidly at first and then remained on a plateau for several years. During the past two years noticeable increases have been made. Gradual increases may be expected in the future.

RENTAL FEES COLLECTED

Year	1. High School Books	Fees
1935-36		\$ 36,069.29
1936-37		127,731.81
1937-38		173,414.88
1938-39		199,071.12
1939-40		286,735.04
1940-41		292,235.70
1941-42		306,110.30
	2. Supplementary Readers	
1935-36		\$ -----
1936-37		28,531.61
1937-38		85,146.62
1938-39		92,545.55
1939-40		84,266.62
1940-41		95,675.97
1941-42		104,109.00

Books Rebound. All the books placed in circulation by the State Text-book Commission have been new books. After these books have been used three or four years, they begin to wear out and the Commission is faced with the necessity of discarding or rebinding the usable copies. Many books must be discarded, but a reasonable number can be rebound as indicated by the accompanying figures.

NUMBER OF BOOKS REBOUND

Year	Number
1935-36	-----
1936-37	-----
1937-38	8,720
1938-39	19,205

Expenditures. The figures shown under free books for the year 1935-36 and 1936-37 represent the cost of operating the rental system, as there were no free books prior to 1937-38.

The purchase of library books is a new function of the State Textbook Commission. As the figures for these three years show, this service is

increasing very rapidly. It is estimated that purchases during 1942-43 will amount to about \$75,000.

THE SIZE OF THE SYSTEM

The size of the North Carolina public school system may be measured by a number of yardsticks: amount of money expended, number of pupils enrolled, the value of school property, the number of teachers, the length of school term, and others. Since, however, some of these items are presented under different heads elsewhere in this report, they are not repeated here.

Number of Elementary Schools. The number and size of the schools actually taught serve to indicate both the instructional and administrative problems involved. It has been the experience in North Carolina that small schools do not and cannot offer as broad a program of instruction as can be offered in the larger type school. For this reason the trend has been toward a smaller number of small schools and a larger number of large size schools. This trend has brought along with it an increase in public transportation facilities, a subject discussed elsewhere in this report.

The accompanying table indicates this trend as it applies to the elementary schools (grades I-VII).

ELEMENTARY SCHOOLS							
White							
Year	1 teacher	2-3 teachers	4-6 teachers	7-9 teachers	10-14 teachers	15 or more teachers	Total

1940-41	744	839	250	77	65	39	2,015

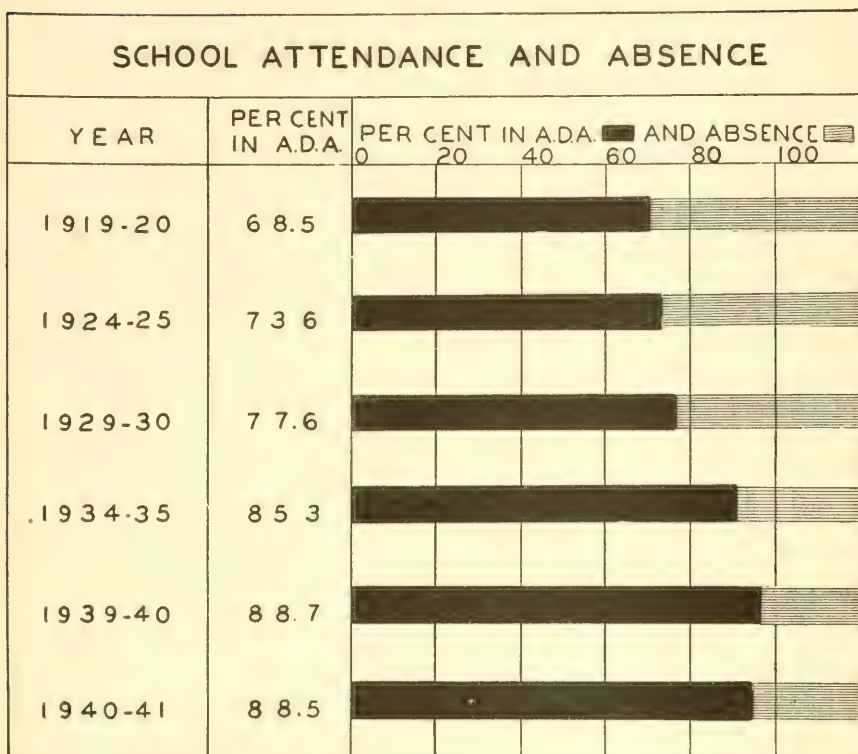

Number of High Schools. The number of public high schools in the State has tended to increase during the period indicated by the table;

and it will be noted that the trend in size as indicated by number of teachers is also toward the larger type. There were in 1940-41 a total of 982 public high schools in North Carolina.

Number of Pupils. According to the State Constitution all children between the ages of 6 and 21 years are entitled to attend the public schools. Upon this basis the census records show a total of 1,125,674 children in this group for the year 1940-41. Since many of this number are in college or at work, the number of children actually enrolled is much less

1940-41	90.1	84.9	88.5

is measured and their size ascertained. Figures showing the percentage of enrollment in attendance indicate that North Carolina boys and girls attend school even better now than prior to 1933, when the eight months school term was established.

Enrollment by Grade. Still another measure of the size of the public school system is the enrollment by grades. It is necessary to know the grade enrollment in providing the instructional services. As figures indicate, the greater portion of North Carolina pupils is in the lower grades. There is a tendency, however, for the enrollment in the lower grades to decrease, whereas the trend is upward in the higher grades. A comparison by number and per cent clearly indicates this trend for the races separately.

Pupil-Teacher Ratio. One of the best indices for indicating the type and size of a school system is the relation of pupil attendance and membership to the number of teachers employed. All other things being equal, it is generally conceded that the smaller the class the more individual attention the teachers can give to the pupils. The accompanying table shows this relationship for the State as a whole for recent years.

PUPILS PER TEACHER
(Not including Classified Principals)

* Including vocational teachers.

School Term. The average length of term the schools operate during the school year is a very definite quantitative measure of school opportunity provided boys and girls. The average term in North Carolina schools, except for the larger city units, was relatively low prior to 1919-20, the effective date of the amendment to the constitution making provision for a six months school term.

Following 1919-20, as the table shows, the average term gradually increased by the process of voting local taxes in school districts and city units. As a result the average term for the State increased to 154.7 days,

AVERAGE SCHOOL TERM IN DAYS

Year	White	Negro	Total
1919-20	135.9	127.4	134.0
1924-25	148.0	136.3	145.2
1929-30	159.6	141.0	154.0
1931-32	160.0	142.9	154.7
1933-34	160.2	157.3	159.3
1935-36	161.4	160.6	161.1
1937-38	163.8	163.4	163.7
1939-40	164.4	164.2	164.3
1940-41	164.7	164.4	164.6

the highest point prior to the financial depression, by 1931-32. Two years later, 1933-34, the State eight months school term became effective, thus increasing again the average term, to 159.3 days. Since that year this average has gradually increased as a result of special taxes voted for a nine months term in city units. It will be noted from the table that the average term for white and Negro schools is approximately the same.

Enrollment By Term. Contrary to the beliefs of many people, when the argument for a State-wide eight months school term was advanced, that the children would not attend school for the longer term, the figures on enrollment by term and per cent of enrollment in attendance show conclusively the opposite effect. As has been shown school attendance was decidedly better in 1939-40 and 1940-41 than prior to 1933-34, the year that the eight months school term became effective. The accompanying table shows that there are very few children—white and Negro—enrolled in schools having terms of less than eight months. As a matter of fact, the number of children attending schools

having nine months terms has increased until now there are almost as many in such schools as there were in 1929-30. This indicates that children will attend school for the duration of the term provided.

ADMINISTRATIVE SERVICES

The services rendered by the State Superintendent of Public Instruction and the members of his staff, including the State Textbook Commission and the Division of Vocational Education, are many and varied. Some of these services are set forth, however, for the benefit of those who would like to see such services outlined. It should be understood that this outline is very brief and does not include the multitude of clerical and stenographic duties performed by the personnel of the

Department. Furthermore, it should be stated that, in many instances, the services listed here indicate the initiation or beginning of that particular service to the schools, and that in the final analysis the local boards of education, superintendents, principals, teachers, and other school employees actually make them effective. The schools have been provided for the children of the State; and it is to their welfare and training that all our efforts are directed. The first section of this Report is in fact an expansion of the services outlined here.

I. *Addresses, Talks, Discussion Leaders.*

The Superintendent and some staff members are available for commencement exercises, P.-T.A. meetings, civic clubs, teachers' meetings and schoolmaster clubs, women's clubs and organizations, radio appearances, and discussion leaders.

II. *Administrative and Professional Services.*

A. To the public schools—

1. Assistance in making county-wide surveys of the school situation—sites, buildings, school attendance, consolidation and transportation for the improvement of educational facilities.
 - a. Coöperating in the selection of sites in the location of new buildings.
 - b. Coöperating in the improvement of school grounds.
 - c. Making suggestions concerning additions to buildings.
 - d. Making available plans and specifications for small buildings.
 - e. Measuring the utilization of school plants and suggesting ways by which a broader use of existing plants may be made.
 - f. Assisting in securing equipment and supplies, including library and laboratory equipment and supplies.
2. Assistance in adjusting and settling disputes and misunderstandings.
 - a. Interpreting school laws and regulations.
 - b. Suggesting possible solutions of school problems.
 - c. Securing rulings from the Attorney General.
3. Assistance in the better organization of schools.
 - a. Setting up requirements for accreditation.
 - b. Preparing teacher schedules and classroom work programs.
 - c. Introducing new courses, including vocational education and war-time classes.
 - d. Inspecting schools and giving suggestions for their improvement.

- e. Furnishing assistance in the organization and use of school libraries.
 - (1) Advice on the selection and purchase of desirable books and other library materials by preparing general and special lists: e.g., N.C.E.A., *Twenty-five Dollar Per Grade Elementary Library, Our Democratic American Heritage*.
 - (2) Advice regarding the library room and its equipment; e.g., *Design and Equipment of Consolidated School Libraries*.
 - (3) Advice regarding employment of school librarian, both to the superintendent and to the librarian.
 - (4) Check of school library facilities in relation to requirements for accredited school and recommendations for meeting requirements; e.g., summary sheet.
 - (5) Preparation of materials for promoting library usage; e.g., *North Carolina School Library Handbook* (25c), *Book Week Bulletin*, program on school libraries for P.-T.A. program bulletin.
 - (6) Visits to schools and talks to groups; such as P.-T.A., Rotary, teachers meetings, and the like.
- 4. Assistance in the improvement of the training of teachers and instructional service.
 - a. Developing and directing definite programs of pre-service training in the colleges and normal schools.
 - b. Sponsoring continuous yearly summer school programs for teachers.
 - c. Assisting in the organization of extension classes.
 - d. Conducting group and district teacher meetings.
 - e. Assisting in the employment and placement of teachers.
 - f. Issuing certificates to teachers on basis of credits earned.
 - g. Determining the training of teachers and principals in the administrative units.
 - h. Preparing courses of study and guide books for teachers and administrators.
- 5. School budget and accounting service.
 - a. Giving salary ratings of teachers and principals in accordance with the State standard salary schedule.
 - b. Determining salary costs of schools in accordance with allotment of teachers and on basis of State salary schedule.
 - c. Furnishing statements showing amounts due State Literary and Special Building Funds.

- d. Verifying amount of funds paid administrative units with public accountants.
 - e. Assisting in the preparation of budgets and applications for loans.
 - f. Assisting in the proper accounting of school funds.
 - g. Furnishing forms for making reports, budgets and keeping records.
6. Financial Assistance.
- a. Recommending loans from State Literary Fund for building and equipping schoolhouses.
 - b. Assisting in securing loans and grants from Federal agencies for repair and construction of school plants.
 - c. Administering vocational funds for salaries of teachers of vocational subjects and of war-time workers.
 - d. Aiding in the distribution and administration of private funds:
 - (1) Jeanes Fund for employment of Negro supervising teachers.
 - (2) Slater Fund for equipping Negro high schools.
 - (3) Rosenwald Fund for purchasing library books for Negro schools.
 - (4) General Education Board funds for health teaching, and for purchasing equipment in Negro colleges.
7. Textbook Service.
- a. Assisting in the selection and adoption of textbooks.
 - b. Purchasing and distributing free elementary textbooks.
 - c. Furnishing through the State Textbook Commission necessary books for units having rental systems.
 - d. Providing library books for sale.
 - e. Furnishing necessary forms and instructions for all transactions under both free and rental plans.
- B. To institutions of higher education—
- 1. Assistance in matters pertaining to teacher training.
 - 2. Assistance in the administration of regulations of the N. C. College Conference.
 - 3. Assistance with any other problems in which college-department regulations exist.
- C. To P.-T.A.'s, parents and other citizens—
- 1. Assistance in the organization of parent-teacher associations.
 - 2. Assistance in campaigns to raise money for equipment, libraries, beautification of grounds and other school needs.

3. Assistance in campaigns for holding local tax elections for the improvement of schools.
4. Participation in programs initiated by the organization.

D. To Architects—

1. Help in developing plans and sketches of school plants.
2. Assistance by reviewing and approving plans for school plants.
3. Assistance by supplying information concerning current practices in planning school plants.

III. *Informational Service.*

- *1. Issues and distributes bulletins—reports, courses of study, directory, laws, etc.
2. Issues *Public School Bulletin* and *State School Facts*.
3. Prepares material and information for the use of members of the General Assembly.
4. Issues statistical information and mimeographed material giving facts about the schools.
5. Issues form letters and statements to school executives concerning the administration of the schools.
6. Writes letters in reply to specific inquiries relative to the public schools and higher institutions.

IV. *Special Services.*

1. Develop and administer part-time commercial classes.
2. Organize and administer day-school and evening adult classes for industrial workers.
3. Promote a program for finding, training and placing civilian cripples.

* During the current biennium the following publications were issued by the Department:

<i>Publication Number</i>	<i>Number of copies</i>	<i>Title of Publication</i>

THE TEACHING PERSONNEL

North Carolina has always been conscious of the importance of the teacher in public education. Progressively and rapidly quantitative standards for the teacher have been raised until no state in the entire United States has higher standards for its elementary teachers than North Carolina. Only three states require more training for a beginning secondary school teacher than North Carolina. But the War is making serious inroads into the teaching personnel. Men teachers have been selected for military services. Other men have gone into more lucrative civilian and war jobs. Many women teachers are enlisting in the WAVES and WAACS. Other women teachers are going into various types of civilian and war jobs. Undoubtedly 1942-43 will see a break in the upward trend in the scholarship of the teachers, a trend that has been constant and uninterrupted for the past two decades. This will be especially true of the white teachers. Only a general reconsecration to the importance of the teacher will prevent a very serious lowering and breakdown of the high standards which have been reached in teacher education and in the present scholarship level of the teachers.

The purpose of this section on "The Teaching Personnel" is not to discuss the work of the teachers, but to reveal the progress which has been made in the education of teachers during the past two decades. There is little need for discussion. The story is told mainly through statistics organized into certain tables.

Number of Teachers Employed

The table on the number of teachers, principals, and supervisors employed shows an increase of more than 50 per cent. According to present population trends, the saturation point has about been reached in elementary and secondary school enrollments. Any substantial increase in

personnel in the future will come through a change in the present basis for teacher allotment.

NUMBER TEACHERS EMPLOYED			
(Including Principals and Supervisors)			
Year	White	Negro	Total
1919-20	12,970	3,884	16,854
1924-25	16,986	5,355	22,341
1929-30	17,991	5,973	23,964
1931-32	17,286	6,164	23,450
1933-34	16,815	6,531	23,346
1935-36	17,402	6,833	24,235
1937-38	18,020	6,978	24,998
1939-40	18,538	7,238	25,776
1940-41	18,682	7,318	26,000
1941-42	18,860	7,313	26,173

Scholarship of Teachers and Principals

A story of remarkable progress is suggested by the table headed "Training of Teachers and Principals." In 1921-22 the average training of white teachers and principals was less than one year of college education (.926) and for the same year the average training of Negro teachers and principals was less than four years of high school (3.517). For 1941-42 it will be noted that the average training for whites is 3.928 years of college work, while for the Negroes the average training is 3.764 years of college preparation. Looked at in another way, in 1921-22 only 15.8 per cent of the white teachers and principals and 2.6 per cent of the Negro teachers and principals had had four years of college education, while in 1941-42 the respective per cents were 94.0 and 84.6.

For more than twenty years the principal's certificate has required six semester hours of appropriate professional education beyond an undergraduate degree. Since 1931 a degree from a standard four-year college has been one requirement for certificates issued to beginning high school teachers. As of July 1, 1940, a degree from a four-year college became one of the requirements for a certificate issued to a beginning elementary teacher. These facts, together with the further fact that most of the teachers and principals have now had four years of college work, justified the State in projecting part of its teacher education on the graduate level. Accordingly a Graduate Certificate, requiring among other conditions a master's degree is now being issued teachers. That certificate was issued as of July 1, 1941 for the first time. About 350 teachers held the certifi-

cate for the school year 1941-42. As of July 1, 1942 a Principal's Certificate is being issued, one requirement for which is a master's degree.

In-service Teacher Education

One may summarize the history of teacher education requirements in North Carolina by saying the qualifications for entering the profession were very, very low at first, with additions and gradual increases in requirements until the present level had been reached. As late as 1917 the chief agency for training elementary teachers was the elementary school itself. Until that date most teachers in the rural elementary schools had been certified by passing an examination which itself was based upon the subjects of the elementary school. Even as late 1922 two years of high school education could be offered in lieu of successfully passing the examination. A little later than that all certification by examination was abolished, substituting therefor college credits. By 1940 a degree was required for beginning elementary teachers.

The nature of this process of teacher education made necessary a program of in-service education. The chief agencies for this type of education have been the summer schools in this and other states and the programs of extension work offered by certain colleges. The importance of these agencies may be revealed in the tables on summer school enrollment and enrollment in extension work. The effectiveness of the work may be seen in the table giving the training of teachers and principals.

Salaries of Teachers and Principals

The teaching personnel is adversely affected by the relatively low remuneration which teachers receive. The average annual salaries of teachers and principals are substantially less than the salaries received in other lines of work by those with comparable education. A practical result of this economic factor is that often those individuals with the keenest minds and with the most ability do not choose teaching as a profession. While salaries are still low, it is encouraging to note that the trend is upward. This is due to increased scholarship of the teachers, longer experience, and an expansion in local supplementation.

One dark side of the salary picture has been remedied by the State's retirement system which was inaugurated on July 1, 1941. Teachers who now teach until they reach the retirement age may face old age with assurance of some measure of security during their last days.

WHAT THE SCHOOLS NEED?

HISTORICAL BACKGROUND

Before setting forth the needs of the public schools, let us review briefly the public school situation as it obtained from 1933, when the State assumed responsibility for the financial support of an eight months' school term, to the present.

The General Assembly of 1933 had one of the most difficult problems to solve that ever came before a North Carolina law-making body—that of providing the money for operating all State governmental agencies and institutions, including the minimum school program. The General Assembly of 1931 had already assumed the cost of operating the Constitutional six months' term with additional aid to schools operating for eight months. But due to a breakdown in the local tax structure of the State, these latter schools were finding it increasingly difficult to keep their doors open. Taxes simply could not be collected, and hence the representatives of the people in the General Assembly were faced with the task of keeping the schools in operation during the financial crisis.

The situation was met squarely by the General Assembly, however, and with sacrifice and hard work on the part of the school people the doors of our public schools were kept open for the boys and girls of the State. School spending of all sorts was reduced. State standards for the minimum program were set up. Administrative changes were made, and a financial policy was established with the acknowledgment that the support of the public schools was a State responsibility.

The annual cost of operating the public schools was reduced from approximately \$24,000,000, to \$18,000,000. The General Assembly made an appropriation of \$16,000,000 annually for this purpose, and the remaining amount was obtained from fines, forfeitures, penalties, and poll and dog taxes in the local units.

Written into the law was a provision to abolish all taxes levied in the local districts for the operation of the schools. Administrative units, however, were given the authority to vote *de novo* for supplementary taxes with which either to operate the schools for a ninth month, or on a level higher than that provided at State expense, or both. Under this legal authority only seven units were successful in voting the additional taxes necessary; and consequently 119,145 children who had attended schools operating nine months prior to 1933 were denied that opportunity during the year 1933-34.

The growth and improvement in the State public school system from 1933-34 to 1939-40 was given in Part I of my preceding Report. Many

of the problems that were involved in this period of our educational development are readily ascertained.

Chief of these problems is the need for increased financial aid from the State for the support of the eight months' school term. The accompanying table shows the amounts appropriated by the General Assembly for this purpose from 1933-34 to 1940-41.

LEGISLATIVE APPROPRIATIONS	
Eight Months' School Term	
Year	Amount
1933-34.....	\$ 16,000,000
1934-35.....	16,000,000
1935-36.....	20,000,000
1936-37.....	20,031,000
1937-38.....	23,796,367
1938-39.....	24,956,160
1939-40.....	25,941,313
1940-41.....	27,000,000

A second problem that entered into this expansion of the public school system was the increase in funds for vocational education. During the depression period the State appropriation for vocational education was less than \$100,000 annually. Following the trend of increased appropriations for all other purposes, however, the amounts made available by the General Assembly for this vocational education program have been increased from year to year, as the accompanying table shows.

APPROPRIATION FOR VOCATIONAL EDUCATION	
Year	Amount
1933-34.....	\$ 90,000
1934-35.....	90,000
1935-36.....	146,000
1936-37.....	160,000
1937-38.....	264,200
1938-39.....	264,200
1939-40.....	325,000
1940-41.....	350,000

A third important step that was taken during this period was the provision for free basal textbooks for the pupils of grades 1-7 and for a rental system for the pupils in other grades.

During this period, too, the law with reference to voting taxes was liberalized to permit districts within county units having a school population of 1,000 or more to vote taxes for a ninth month, a twelfth grade, for the employment of vocational teachers, or for the improvement of the schools above the level provided in accordance with State funds. Prior to this provision in the law a number of county and city units (45), and four districts under the authority of special acts, had voted special taxes for one or more of these purposes. The liberalization of the law did not appreciably increase the number of districts that had already voted taxes for supplementary purposes. A few additional city units, however, were added to the number which stood at 44 city units, 2 county units and 7 local districts at the end of the school year 1939-40.

Of course, there were other adjustments made in the administration and operation of the public school system of the State during this period. With the increased funds made available, the salaries of teachers, principals, superintendents and other school employees were increased as much as possible. During this period also there was general improvement in the training of the teaching personnel. As a result the instructional program was strengthened and expanded to include a number of new offerings to the boys and girls of the State. Greater emphasis was placed upon music education. Art instruction was begun in a number of schools. Departments of commercial education were increased. And under the direction of a State Adviser of Health and Physical Education programs of physical education and health instruction were organized with special teachers in these fields. This, then, is a bird's-eye picture of the situation that prevailed prior to 1941.

ACHIEVEMENTS DURING THE BROUGHTON ADMINISTRATION

At the very beginning of the present administration in January, 1941, our esteemed Governor, Hon. J. M. Broughton, took the lead, in his inaugural address, in advocating a program for the enlargement and expansion of the public school system. As a matter of fact, he had already set the stage for his recommendations to the General Assembly of 1941 by appearing before the Advisory Budget Commission as the party nominee for Governor and making certain suggestions to that body. Under his able leadership, the General Assembly of 1941 enacted into law many of the recommendations which he made. Upon the basis of these laws, the public schools are being expanded and opportunities broadened for our North Carolina boys and girls.

A review of the acts of the Legislature of 1941 as they relate to public education reveal the following outstanding accomplishments:

1. *The Establishment of a State Retirement System.* The passage of this act involves the additional annual expenditure of \$1,200,000 from State funds for the benefit of teachers, but which in the long run touches the lives of all school children. The establishment of this system should result in better teaching, longer tenure for teachers who have been trained for teaching, security in old age for those teachers who serve the State for long periods of time, and their retirement at an age when they no longer are fitted for classroom work. All of these values of retirement have their relation to the child.

2. *A Modified Continuing Contract.* Under the provisions of an amendment to the School Machinery Act, a teacher now employed in the public schools of the State remains under contract from year to year unless she is actually notified of her dismissal ten days prior to the close of school. This law will tend to prevent indiscriminate firing of teachers for petty or political reasons. A provision of the law protecting the employing board provides that the teacher must give 30 days' notice prior to the opening of school before resigning her position.

3. *Salary Increases.* The General Assembly made several provisions in the operation of the salary schedule, each of which grants better pay for teachers and principals.

In the first place, an additional increment was provided for teachers having taught nine years and for principals with five years of experience.

In addition, funds were provided for establishing a new rating covering those teachers who have earned graduate degrees including the completion of certain special requirements and experience.

Special appropriations of \$250,000 for 1941-42 and \$507,500 for 1942-43 were made for the purpose of reducing the differential now existing between salaries paid white and Negro teachers.

4. *A Twelve-year Program of Instruction.* The provision for the gradual introduction of a twelve-year program will have far-reaching effects upon the lives of the boys and girls of this generation. This act will put North Carolina among the majority of states in this respect, leaving only five states having eleven-year organizations.

For the purpose of making plans for the transition from an eleven-year to a twelve-year program an appropriation of \$50,000 was made. For the introduction of the program in 1942-43 the appropriation is \$400,000. This strengthening of the public school system will enable our boys and girls to stay in school a year longer and make it possible for them to graduate nearer the time when they can be employed in the industrial and commercial life of the State. For those who go to college, the added year will provide time for more adequate preparation for college study.

5. *Vocational Education.* It was very largely through the recommendation of our present governor that the program of vocational education has been expanded. The General Assembly of 1941 increased the State appropriation for vocational education from \$350,000 annually to \$600,000 in 1941-42 and to \$710,000 in 1942-43.

6. *Other Appropriations.* In addition to the above-named items, appropriations were continued for the following purposes:

- a. Adult education, \$30,000 annually.
- b. Free textbooks, \$200,000 annually.

The total of appropriations for the support of the various functions for the two years, exclusive of retirement is as follows:

	1941-42	1942-43
(1) Support of the 8-months school term	\$28,158,324	\$29,454,233
(2) Vocational education	600,000	710,000
(3) Adult education	30,000	30,000
(4) Free textbooks	200,000	200,000
Total	\$28,988,324	\$30,394,233

7. *In addition* to these advances represented by increased appropriations, provision was made for submitting to the people a Constitutional amendment providing for a single State Board of Education to take the place of the several boards and agencies now charged with the administration of the public schools. This amendment will be voted upon this fall, and if passed there will then be unified control in the operation of the public schools of the State. (Note: This amendment passed and becomes effective April 1, 1943.)

RECOMMENDATIONS

As I have stated in former reports, the public schools are growing institutions. They are democratic, both in their origin and in their outlook on the future of our State and Nation. Hence, they must be flexible at all times, in that they will always reflect the desires of a democratic people. In other words, the public schools need to be adjusted from time to time, with the ever present purpose of improving them, to meet more nearly the needs of boys and girls in their endeavor to prepare themselves for living as adults.

As most North Carolinians know, our public schools have passed through various stages of growth, from their beginning more than a hundred years ago right on up to the present administration. We expect

to continue to make progress in this great area of our democratic life. And with the aid of the General Assembly of 1943, we hope that the legal steps necessary will be taken by which certain needed adjustments in the public school system of the State can be made in the near future.

As Superintendent of Public Instruction, I am suggesting that serious consideration be given to the following proposals, and that if possible laws be enacted implementing their inauguration:

1. **Increase in State Funds.** In my request to the Advisory Budget Commission, I have requested an increase in funds with which to operate the schools. For the several purposes other than for the operation of the regular State-supported school term the amounts estimated to be spent during 1942-43, and my requests for 1943-44 and 1944-45 are as follows:

	<i>Estimated for 1942-43</i>	<i>Requested for 1943-44</i>	<i>Requested for 1944-45</i>
Vocational education.....	\$ 710,000	\$ 806,111	\$ 860,111
Rehabilitation maintenance.....	10,000	12,000	12,000
Industrial arts		50,000	50,000
Vocational camps		5,000	5,000
Adult education	30,000	48,000	50,000
Textbooks	423,000	400,000	400,000
Total	\$1,173,000	\$1,321,111	\$1,377,111

For the operation of the State-supported school term I have made calculations on the following four bases, with the recommendation that, if possible, provision for No. 4 be made. In each instance the sum of \$250,000 is included for the first year of the next biennium and \$507,500 the second year for increasing the salary schedule for Negro teachers. The amounts necessary for operating the public schools in accordance with the several plans proposed are as follows:

	<i>Estimated for 1942-43</i>	<i>Requested for 1943-44</i>	<i>Requested for 1944-45</i>
1. Present program	\$29,628,695	\$30,326,177	\$31,186,915
2. Add ninth month.....		33,781,022	34,746,378
3. Raise salaries 15 per cent....		34,380,608	35,325,292
4. Both 2 and 3.....		38,326,271	39,386,065

To put into effect these several plans, the following additional amounts will be necessary for the first year of the biennium.

Present program	\$ 697,482
Ninth month	3,454,845
15 per cent salary increase.....	4,054,431
Both 9th month and 15 per cent salary increase.....	8,000,094

These amounts appear large in the minds of the average citizen, but in comparison with what is being done in other states on a per pupil basis, they are relatively small. If North Carolina is to keep pace with the other states in this matter of public education, then a much greater fund must be provided with which to operate the schools. If the future citizens of this State are to compete in a national labor market, then our citizens must be better prepared to do the jobs that are available. Jobs cannot be performed without a thorough knowledge of the fundamentals; nor can proper training be imparted if all the best teachers leave the profession for work where the remuneration is far in excess of that a teacher in this State receives.

2. A State-supported Nine Months' School Term. The \$3,454,845 which I have requested to be added to the State appropriation for the public schools is for the purpose of operating a ninth month on the same basis as the present eight months' school term is operated. I have made this request for the following reasons:

a. All North Carolina boys and girls should have the opportunity that is now enjoyed by approximately one-fourth of the State's total school enrollment.

b. A ninth month will over the entire life-history of a school child add twelve months to his opportunity for added instruction.

c. The ninth month added to the present term will lift North Carolina's educational rank among the other states. There are now only six states with a lower average school term than the 164.6 days for this State.

d. Due to the fact that wealth is unequally distributed over the State, there is no chance that the boys and girls in most of the rural sections of the State will ever be provided with schools having terms of nine months, unless the State assumes the responsibility for the support of the additional month.

e. There are only five states that spent during 1940-41 less per pupil in average daily attendance than North Carolina did. Those states were Alabama, Arkansas, Georgia, Mississippi, and South Carolina. The national average expenditure per pupil in average daily attendance was \$92.38. The average for this State was \$43.86, less than half that of the Nation.

f. In view of the fact that a majority of the city units now have a ninth month, the added month on a State-wide basis would benefit in the main the rural children of the State.

g. With a nine months' school term on a State-wide basis, the advantage in securing the best teachers by city units would have a tendency to decrease.

h. And finally, I believe an added month of instruction will tend to decrease the retardation now prevalent over the State, especially in rural areas.

3. **Salary Increase.** Since this Nation entered the war, it has been estimated that the cost of living has increased between 15 and 20 per cent. Realizing that this increase in the cost of living actually results in a reduction in the salaries paid teachers and other school employees unless an increase in salaries to offset this higher cost of living is granted, I have recommended to the Advisory Budget Commission and to the General Assembly that a 15 per cent increase in salaries effective with the school year 1943-44 be granted to all school employees.

It is estimated that it will take \$4,054,431 additional funds to make this increase possible. But when it is considered that other workers, especially labor, have already been granted large salary increases, and that the teachers of the State are being paid relatively low salaries, I believe that the money necessary for this boost in the economic level of the teacher's spending power is not only timely, but that it is more than justifiable.

According to figures for 1940-41, the average salary paid teachers and principals in North Carolina was \$975.00 annually. There were only twelve states that paid its instructional staff a lower average annual salary than this amount. On a monthly basis (teachers and principals live twelve months a year), this figures \$81.25. Many workers in war industries receive this amount *per week*. A majority of such workers have far less training; in some instances only six weeks in a specific type of work. To contend, therefore, that the services of the people who train our boys and girls should be worth only one-fourth of that of workers in war industries is preposterous. There should be some equalization of the remuneration paid to all classes of workers. The 15 per cent raise in salaries of school employees which I have proposed will not begin to fill the gap, but this amount of money will do a lot of good in preserving the morale of the teaching force and in the long run will tend to make better citizens of the boys and girls now in school.

I most urgently recommend, therefore, that the necessary funds be appropriated to allow this increase for these public employees.

4. **Vocational Education.** Largely as a result of the support of Governor Broughton, the General Assembly of 1941 materially increased the appropriation for vocational education for the biennium 1941-43. It is estimated that for the current year the entire amount, \$710,000, made available will be needed to expand this program.

For the next two years we desire to expand this program still further. The increases requested for these two years are relatively small considering the fact that the need for vocationally trained persons has materially increased. Not all the boys and girls will be taken into the armed services. Sufficient labor will of necessity have to be left on the farm to produce the food needed for those in the military services as well as those in civilian life. Then, too, a part of these funds is expended in the training of boys and girls for trades and industries that must continue in operation. If the schools are to train these boys and girls for this work, then the whole program must be enlarged to that end.

In addition to the \$806,111 for 1943-44 and \$860,111 for 1944-45, I have requested that \$50,000 be granted each year for a program of industrial arts. This fund would be used to supplement the program of vocational education, and would be used prior to the students' eligibility to enroll in the vocational program. It would introduce boys and girls to vocational arts before they become tired of the regular academic course; and would tend to keep boys and girls, especially those not wishing to pursue further academic training, in school until their graduation from high school. I believe a program of this sort will do more than any other one thing in strengthening the holding power of the public high schools of the State and thus tend to eliminate much of the retardation and non-promotion now prevalent in many of our schools.

As stated in my last report, I believe that an effective program of industrial arts for the benefit of those boys 12 to 16 years of age for whom the regular academic program does not fit will decrease delinquency and crime and aid materially in the preparation of many boys for some life trade. I hope, therefore, that this appropriation will be made.

5. **Compulsory Attendance.** The North Carolina compulsory attendance law needs to be rewritten in the light of present-day conditions.

In the first place, the present maximum age of enforcement should be raised from 14 to 16 years. We should at least keep pace with the majority of other states in this respect. In accordance with the record as of January 1, 1942, the beginning ages of compulsory attendance in the several states were as follows:

6 years old in 2 states
7 years old in 34 states
8 years old in 12 states

North Carolina is one of the 34 states with a compulsory attendance age beginning at seven years old.

As to the ending age the record for the states is as follows:

To 14 years old,	3 states
To 15 years old,	1 state
To 16 years old,	33 states
To 17 years old,	6 states
To 18 years old,	5 states

This State is one of the three states, the other two being Georgia and Louisiana, that has a compulsory attendance law which does not include a child once he reaches his fourteenth birthday.

We should change our law, then, in order that we will be at least with the majority of the states in this respect.

Secondly, machinery for the enforcement of the law should be provided. And by enforcement I do not mean simply police power. By "enforcement machinery" I mean an organization for the sympathetic understanding of the problems involved in school attendance as it relates to parents, teachers, and students, and in working with each in an effort to secure regular school attendance. In my opinion, the major problem of school attendance is concerned with the proper "education" of the parents. The failure on the part of parents to realize the importance of *regular* school attendance is perhaps the chief reason for poor attendance by many pupils and as a consequence their failure to complete the required year's work.

In reply to a recent questionnaire with reference to the compulsory attendance law, the question was asked a number of teachers: What have been the principal reasons for illegal attendance? The following reasons were those given in answer to this question: To work at home; out of town; bad weather; truancies; bad home influences; parents' non-coöperation with spirit of law; ignorance and indifference as to what school means to children; misplacement of over-age children in the social group; and lack of ambition of parent and child.

All of these replies, it will be observed, stem from the home and its influence. The need, therefore, of a properly trained person to work with the parents themselves is urgent. This person may be an attendance officer, a visiting teacher, an adult education worker, or someone whose duties are more than just law enforcement. He or she should be well qualified for a difficult but very important job.

Another question as to how the efficiency of instruction was affected by irregular attendance was answered affirmatively by all teachers with the following typical clarifying comments:

1. Retarded the work of the entire class.
2. Discouraged the individual himself.
3. Required individual attention to the pupil who was absent.
4. Divided time of teacher between repetition and advance.
5. Regular work interrupted to assign make-up work for children who were absent.
6. Has been chief cause of retardation.
7. Lowered standard test rating of class.
8. Results in the necessity to reteach material.
9. Slows up tempo of school work.
10. Causes "problem" children.

These replies are sufficient to indicate the difficulty that the teacher has when children are absent from school for various causes, many of which are unnecessary and could be avoided if someone were employed to work with teachers, parents and students on this question.

Where such a person is employed these problems disappear. One superintendent of a city unit, when asked about how instruction had been affected by unexcused absences replied: "We do not have a problem of excused and unexcused absences in our schools. We have one of the best Attendance and Visiting teachers that I have ever seen; therefore, absences do not affect the efficiency of our instruction here."

If good results can be obtained in one place, I am of the opinion that similar results may be obtained in other school units. I am, therefore, making the following recommendations to the General Assembly with reference to this whole question of school attendance:

1. Create in the Department of Public Instruction a Division of School Attendance. In order to promote a uniform and effective program throughout all the schools of the State a unifying office must be established. The person in charge of this program should have charge of supervising the school census each year and with the approval of the State Superintendent prepare uniform forms and regulations for the approval of the State Board of Education for the proper enforcement of the law. Then, too, the State official should hold conferences with the various local attendance officers on the performance of their duties, including the proper procedure in securing better attendance among the school children of the State.

2. The compulsory school law should be rewritten in such a way that all children embraced within the compulsory attendance ages will be enrolled in school and that unnecessary absences will be eliminated. In this law the ages of compulsory attendance should be from 7 to 16 inclusive, and thus tie in with the labor law which provides that no

child under sixteen years of age shall be employed in any manufacturing occupations, or in non-manufacturing occupations except by permit, while school is in session.

3. An appropriation for carrying out this proposed plan of school attendance should be made. This appropriation should be ample to do the job as proposed here. The following budget is suggested as the minimum amount for putting the proposed program into operation:

For State office, a director, secretary, travel, supplies.....	\$ 16,000
For 1/2 salaries 167 attendance officers.....	167,000
For travel of attendance officers.....	67,000
Total	\$250,000

This proposed expenditure figures less than 30 cents per child per year; but such an expenditure, if results are obtained, will be worth more than this sum in better instruction for all the children of the State. I hope, therefore, that the General Assembly will authorize the program as outlined.

6. **Health and Physical Education.** To my mind, no part of the instructional program has been more fruitful in results during the past year than the physical and health education programs begun shortly after Pearl Harbor. Of course, at this time, it is still too early to measure the full results of that program, but the facts that can be definitely pointed out are evidence of what can be done and what is needed to be done for the boys and girls in the schools. In order not to repeat these results here, I wish simply to refer you to page 15 of this report.

This much has been done without any additional cost except that which could be spared from our present organization and with the co-operation of the doctors and dentists of the State. The physical defects found by these examinations need to be corrected, if they have not yet been attended to. Other examinations need to be made. And a permanent program expanded to cover the entire student enrollment should be inaugurated. A staff consisting of only one person cannot begin to cover the State in the promotion of this most essential work. We should, therefore, for our own welfare and for the future growth of our State push forward in this field that has already proven its worthwhileness.

This expanded program of health and physical education should include a greater emphasis upon temperance and more attention to the teaching of the harmful effects of narcotics and alcohol than is now given to this matter.

To finance this proposed program I recommend that the General Assembly make an appropriation of \$50,000 annually. I am confident

that the expenditure of this sum of money will produce excellent results not only to the boys and girls themselves but also in the long run will contribute to a more healthful State.

7. Adult Education. The General Assembly of 1937 provided for the establishment and operation of schools to teach adults. The appropriation for this work was \$25,000 for each of the first two years. For the past four years it has been \$30,000 annually.

Manifestly, a program of this kind cannot be made State-wide on this small fund. At present only 26 units have State-aided adult education programs. In the main these programs are in the more densely populated areas where wealth is sufficient to match the State funds provided. For 1941-42 there were 125 teachers, full and part-time, engaged in this work. A total of 11,227 persons availed themselves of the opportunity provided by the instruction offered. Classes were organized in the following types of instruction: Arts and crafts, Bible, bookkeeping, business English, business spelling, childhood recreation, citizenship and public affairs, dramatics, literary and elementary education, high school English, first aid, gardening, general adult, high school history, home making, lip reading, high school mathematics, music, nutrition, parent education, parliamentary law, physical and health education, practical and home nursing, public speaking, shorthand, Spanish, and typing.

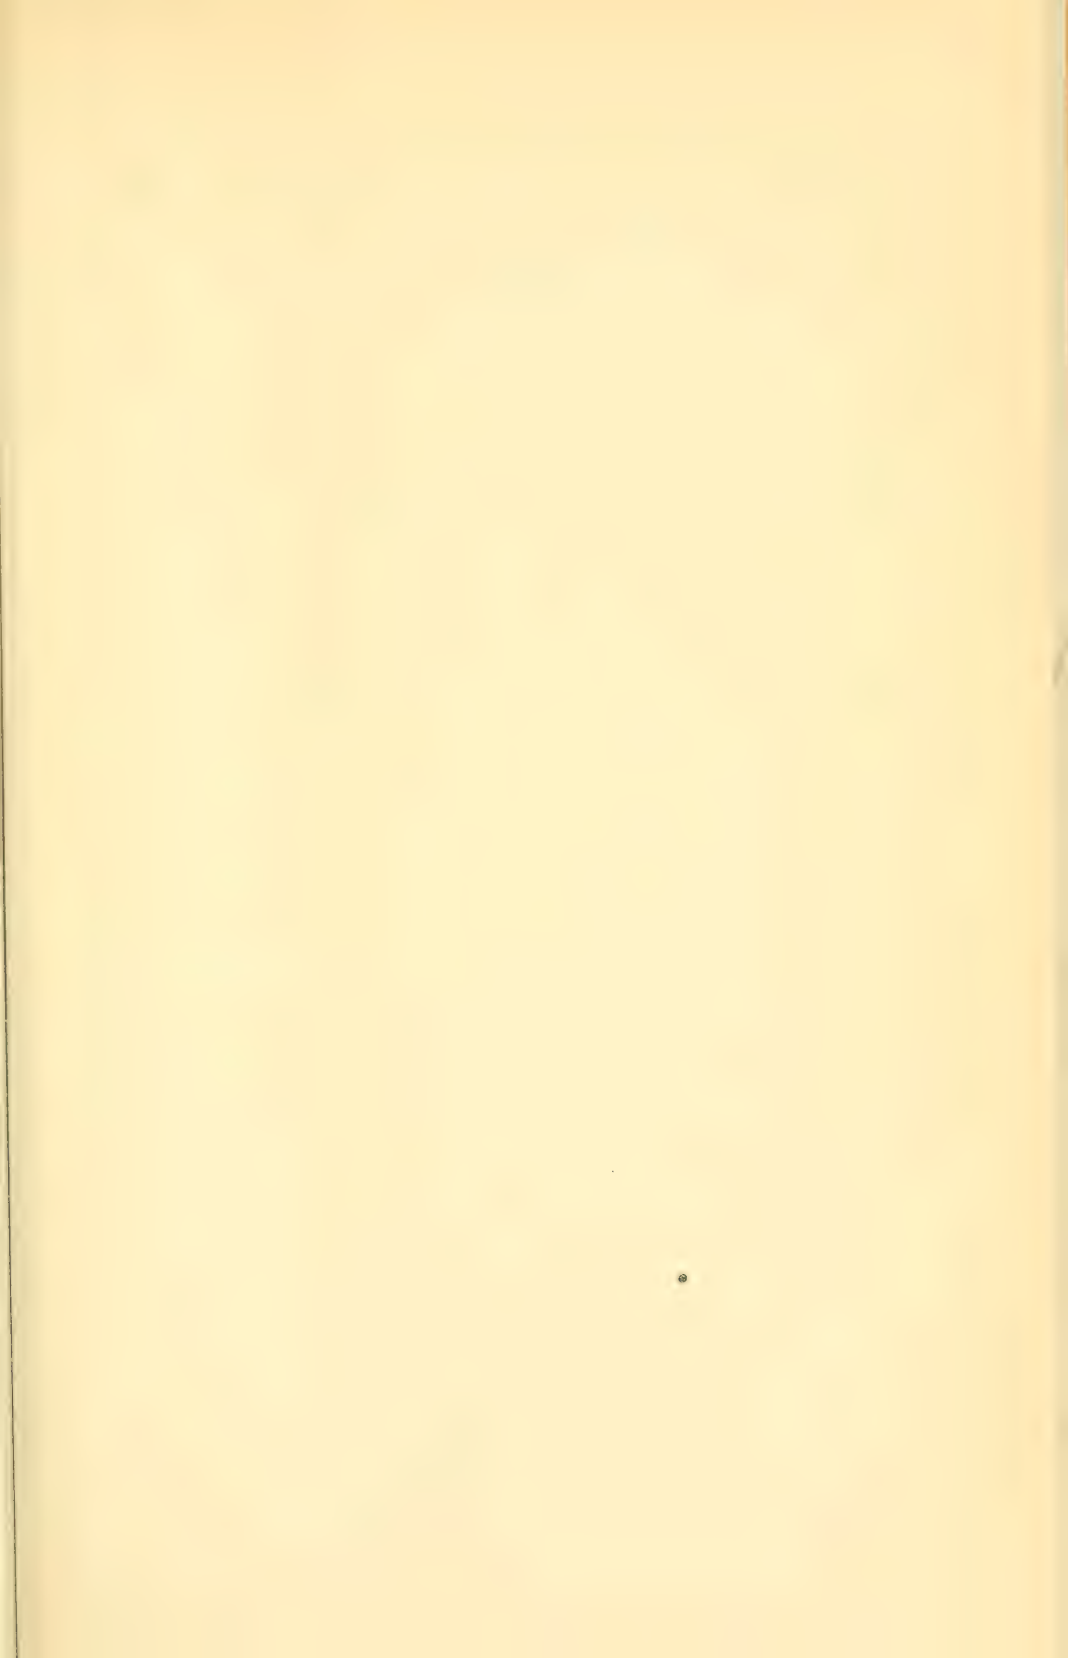

I believe that this work has proven its worth. I have included in my report to the Advisory Budget Commission a request for \$48,000 annually for the continuation and expansion of this work during the next two fiscal years. This represents an increase of only \$18,000 annually in the amount that is now appropriated. I hope that this small increase will be granted.

For further and more detailed information concerning this whole program of adult education, I wish to call your attention to our Publication No. 242, *Adult Education in North Carolina*, issued in 1942.

8. Exceptional Children. I wish to renew my recommendation that something definite be done with reference to instruction in the public schools for the exceptional children of the State. It is unfair to the great body of average children of the State to be hampered in their progress through the schools by those children who by their mental abilities are not able to keep pace. It is also unjust to these mentally slow children themselves. Therefore, it seems to me that a small appropriation should be made for carrying on an experimental program in one or two selected areas of the State in order to determine the technics of organization and instruction best needed for improving the situation in this respect.

9. **Supervision of Instruction.** The law provides that the superintendent of schools of a county or city unit be a graduate of a four-year standard college, or hold a superintendent's certificate. I have repeatedly requested that the qualification of any newly-elected superintendents be raised by requiring that they hold the superintendent's certificate which is issued on the basis of four years' college work including certain professional training and experience. This recommendation was made on the grounds that the superintendent, who heads up the administration of the various local school units, should certainly have as high a standard of training as the teachers and principals under his supervision. To be able to understand the problems involved in a good instructional program and effectively promote such a program in coöperation with teachers, principals and parents, it seems to me that the lower standard for qualifying as a superintendent should be eliminated.

In addition to this change, which over a period of years will tend to improve the instruction of our youth, I think that the time has come when we should give serious consideration to the question of supervision of instruction in the various administrative units. Several of these units have already from local funds provided for the employment of supervisors of instruction. From all reports the instructional forces in these units are more alert to problems of instruction and the entire program is unified to include all the children of the unit. Since under present conditions superintendents do not have the time and in many instances the training for this needed unifying and directional force of a supervisor of instruction, I believe the State appropriation for public schools should include a substantial sum for the employment of persons qualified in both training and experience to give some attention to the improvement of instruction throughout the State and thus get greater returns on the money now invested in the education of our boys and girls.

TABLE I. POPULATION, MEMBERSHIP, ATTENDANCE

This table shows by race for each county (rural) and city school system of the State during 1940-41: the school population (ages 6-21 years), the average daily membership and average daily attendance.

The summary gives the population, membership and attendance figures for North Carolina along with a series of percentage calculations.

SUMMARY OF TABLE I

ITEMS	100 Counties	71 Cities	North Carolina
SCHOOL POPULATION.....	806,620	319,054	1,125,674

TABLE II. ENROLLMENT (a+d+e) BY LENGTH OF TERM

This table shows by race for each rural (county) and city school system of the State during 1940-1941: the number of different pupils enrolled (a+d+e) distributed according to length of school term. This enrollment includes as duplicates those enrolled in two or more administrative units during the year.

The summary gives for North Carolina: enrollment by units (a+d+e), enrollment with duplicates excluded (a+e) and several percentage calculations.

TABLE IV. AVERAGE TERM IN DAYS

This table shows for each race and in combination the average term in days of the elementary and secondary schools in each administrative unit of the State during 1940-1941. The calculations are based upon enrollment data of Table II.

The summary gives pertinent facts concerning deviations from the State-supported term of 160 days.

SUMMARY OF TABLE IV

ITEMS	Counties	Cities	North Carolina
TOTAL NUMBER ADMINISTRATIVE UNITS	100	71	171
NUMBER UNITS HAVING			
Average term of less than 160 days			
For all pupils.....	7	1	8
For white pupils.....	1	1
For negro pupils.....	5	1	6
Average term of 160 days			
For all pupils.....	85	25	110
For white pupils.....	91	25	116
For negro pupils.....	88	30	118
Average term of more than 160 days			
For all pupils.....	8	45	53
For white pupils.....	8	46	54
For negro pupils.....	4	38	42
No negro pupils.....	3	2	5

TABLE V. ENROLLMENT, LOSSES, MEMBERSHIP BY GRADES

This tabulation is a summary of several tables—shows by grades for the State during 1940-1941: the number of different children enrolled (a + e), the number of children dropping out of school or losses, the membership on last day of school and the percentage of enrollment which quit school. There is a division of the figures by race for county (rural) and city school systems.

GRADES	WHITE				NEGRO			
	Enroll- (a + e)	Losses	Member- ship (last day)	% of Enroll- ment Lost	Enroll- (a + e)	Losses	Member- ship (last day)	% of Enroll- ment Lost

TABLE VIII. PUPIL-WORK ACCOMPLISHMENT BY GRADES

This tabulation shows by grade and race for all schools of the State during 1940-1941: the number of pupils doing work of full year, the number performing only a half year's work, and the number accomplishing less than work of half year. The sum of these three groups equals the membership of Table V, thus accounting for all pupils on the roll at close of school.

GRADES	White			Negro		
	Number Pupils Doing			Number Pupils Doing

TABLE IX. INDEX OF ACCOMPLISHMENT BY GRADES

In this tabulation the figures of Table VIII are reduced to percentages. The percentages are combined to form an index-number as follows: 100% of the proportion of pupils doing full year's work, 50% of the percentage doing half year's work and 25% of the proportion for less than half year.

This index considers only those pupils on the roll at close of school; for a ratio based upon enrollment (a + e), see Table XI.

TABLE X. INDEX OF ACCOMPLISHMENT

Based upon the figures summarized by Table VIII, this table presents by race for each administrative unit of the State during 1940-1941: the percentage of membership (last day of school) which did full year's work, the percentage which achieved half year's work, the percentage which accomplished less than work of half year and an index-number combining these percentages. In the index-number, as in Table IX, full credit (100%) is allowed for that proportion of pupils accomplishing work of full year; half credit (50%) is given for the percentage doing half year's work; one-fourth credit (25%) is added for the remaining proportion of pupils. The index is the sum of these three credits.

The summary groups the units of the State in accordance with their relative positions as indicated by this index-number. The index is an attempt to measure the work accomplished during the year by pupils remaining in school; those who quit, the losses of Table V, are not considered in these calculations.

When all pupils entering school during the year are accounted for, as do the percentages of Table XI, an index-number based upon this enrollment (a+e) would be lower than those shown here. How to combine the losses with the three levels of achievement has not been determined; the percentages in each group are given in Table XI.

TABLE XI. RELATIVE ACCOMPLISHMENT OF PUPILS BY GRADES

This tabulation divides the net State enrollment (a+e) into percentages, showing by race for each grade during 1940-1941: (1) the percentage dropping out of school, (2) the proportion doing full year's work, (3) the percentage doing half year's work, (4) the proportion accomplishing work of less than half year. This is an effort to measure the holding and promoting achievements of the school system.

TABLE XII. SCHOLASTIC TRAINING OF TEACHERS

Based upon type of certificate held, this tabulation shows for 1940-1941 the number of teachers—those paid from State Eight Months' School Fund—holding each class of certificate, the proportion at each level of training and an index-number.

Teachers paid from other funds and all principals (building, assistant and classified) are omitted.

AMOUNT OF TRAINING	Type of Certificate	100 Counties	71 Cities	North Carolina

White.....	All	786.5	797.0	789.2
Negro.....	All	752.8	790.4	764.2

*In this index, 800 is the maximum; that is, if all teachers held Class A certificates, the index-number would be 800.

TABLE XIII. EXPERIENCE OF TEACHERS

This summary gives the experience rating for 1940-1941 of teachers paid from State Eight Months' School Fund. Since only 8 increments were allowed on Class A certificates, 6 on Class B, etc., the experience shown is not the actual number of years taught but the number for which the State made compensation.

Teachers paid from other funds and principals (building, assistant and classified) are not included.

TABLE XIV. SALARY SCHEDULES FOR TEACHERS

This table gives the maximum and minimum amounts payable monthly during school term to teachers for the year 1940-1941. The schedules are based upon years of training, which control the type of certificate held, and years of experience in teaching. A represents the maximum; B is the minimum.

A. MAXIMUM

TEACHING EXPERIENCE	Elem. A 1 year college	Class C 2 years college	Class B 3 years college	Class A 4 years college
0	\$ 68.50	\$ 75.50	\$ 82.00	\$ 96.00
1	72.00	79.00	85.50	99.50
2	75.50	82.50	89.00	103.00
3	-----	85.50	92.50	106.50
4	-----	89.00	96.00	110.00
5	-----	-----	99.50	115.00
6	-----	-----	103.40	118.50
7	-----	-----	-----	122.00
8	-----	-----	-----	126.00

B. MINIMUM

TEACHING EXPERIENCE	Elem. A 1 year college	Class C 2 years college	Class B 3 years college	Class A 4 years college
0	\$ 55.00	\$ 57.50	\$ 63.00	\$ 76.00
1	57.50	60.50	66.00	79.00
2	60.00	63.00	68.50	82.00
3	-----	66.00	71.50	85.09
4	-----	68.75	74.00	88.00
5	-----	-----	77.00	91.00
6	-----	-----	79.75	94.00
7	-----	-----	-----	97.00
8	-----	-----	-----	100.00

TABLE XV. SALARY SCHEDULES FOR PRINCIPALS

This table shows the maximum and minimum amounts payable monthly during school term to classified principals for the year 1940-1941. Usually a school must have seven (7) or more teachers to be allowed a classified principal. The schedules are based upon number of teachers in the school and number of years served as principal. There is an increase in principal's pay for every additional teacher—from 7 to 50; enough steps in the schedule are given here to show the trend.

A. MAXIMUM

NUMBERS OF TEACHERS	P-0	P-1	P-2	P-3	P-4
7	\$ 130.00	\$ 137.00	\$ 144.00	\$ 151.00	\$ 158.00

TABLE XVI. INSTRUCTIONAL AND SUPERVISORY PERSONNEL

This table gives for each unit of the State during 1940-1941 a distribution of instructional personnel—employed from all sources—by race and function. Teachers are also divided according to sex.

The summary shows for North Carolina the number of teachers in elementary schools, the number in high schools, the number of vocational teachers, the number of principals and supervisors, the number of clerical assistants, the number of superintendents, then relates the number of teachers to the number of pupils in Table I. Average daily membership and average daily attendance are both used as measures of the teaching load. Fractions appear because of teachers working in elementary and high schools, or teaching and supervising.

SUMMARY OF TABLE XVI

ITEMS	100 Counties	71 Cities	North Carolina
NUMBER OF TEACHERS			
In elementary schools.....	13,568	4,462	18,030
White.....	9,256	2,934	12,190
Negro.....	4,312	1,528	5,840
In high schools (excluding vocational).....	3,648	2,088	5,736
White.....	3,069	1,596	4,665
Negro.....	579	492	1,071
In all schools (excluding vocational).....	17,216	6,550	23,766
White.....	12,325	4,530	16,855
Negro.....	4,891	2,020	6,911
Vocational teachers.....	705	200	905
White.....	628	146	774
Negro.....	77	54	131
TOTAL	17,921	6,750	24,671
White.....	12,953	4,676	17,629
Negro.....	4,968	2,074	7,042
NUMBER OF MEN (teachers)	3,121	906	4,027
In elementary schools.....	1,410	165	1,575
White.....	747	68	815
Negro.....	663	97	760
In high schools (including vocational).....	1,711	741	2,452
White.....	1,437	521	1,958
Negro.....	274	220	494
NUMBER OF WOMEN (teachers)	14,800	5,844	20,644
In elementary schools.....	12,158	4,297	16,455
White.....	8,509	2,866	11,375
Negro.....	3,649	1,431	5,080
In high schools (including vocational).....	2,642	1,547	4,189
White.....	2,260	1,221	3,481
Negro.....	382	326	708
NUMBER OF PRINCIPALS AND SUPERVISORS*			
In elementary schools.....	174	262	436
White.....	143	199	342
Negro.....	31	63	94
In high schools.....	768	125	893
White.....	640	71	711
Negro.....	128	54	182
In all schools.....	942	387	1,329
White.....	783	270	1,053
Negro.....	159	117	276
NUMBER OF CLERICAL ASSISTANTS	138.3	128.7	267.0
In superintendents' offices.....	134.3	81.7	216.0
In principals' offices.....	4.0	47.0	51.0
NUMBER OF SUPERINTENDENTS+	103.9	76.1	180.0

TABLE XVI. INSTRUCTIONAL AND SUPERVISORY PERSONNEL, 1940-1941—*Continued*

ITEMS	100 Counties	71 Cities	North Carolina
AVERAGE DAILY MEMBERSHIP PER TEACHER			
In elementary schools	35.6	36.8	35.9
White.....	35.5	35.8	35.6
Negro.....	35.9	38.6	36.6
In high schools (excluding vocational teachers).....	35.2	32.6	34.2
White.....	34.5	30.1	33.5
Negro.....	38.9	35.6	37.4
In all schools (excluding vocational teachers).....	35.5	35.4	35.5
White.....	35.2	34.3	35.0

TABLE XVIII. SCHOOLHOUSES AND SCHOOL PROPERTY

This table shows by race for each county and city unit of the State during 1940-1941: the value of school property, the number of schoolhouses owned, the average value of each schoolhouse, the total number of classrooms and the average number of classrooms per school. With races combined, the value of school property, total number of schoolhouses and their average value appear for each unit.

The summary gives several details of valuation for all school systems and relates these figures to number of schoolhouses, classrooms, teachers and pupils.

SUMMARY OF TABLE XVIII

ITEMS	100 Counties	71 Cities	North Carolina

TABLE XIX. NUMBER OF SCHOOL UNITS TAUGHT—BY SIZE

This table shows by race for each county and city system of the State during 1940-1941: the number of elementary and high school units taught, classified according to number of teachers employed, and the number of union schools. The union school includes work in both elementary and secondary fields.

The summary gives the North Carolina total for each race with division between counties and cities. There also appears the number of separate elementary and separate high schools, as distinguished from the union schools.

TABLE XX. STANDARDIZATION OF SCHOOLS

This summary shows by race for all elementary and high schools of the State during 1940-1941: the total number of units taught, the number large enough to be standardized, the number of standard schools, average daily membership in all schools, average daily membership in standard schools and the percentage of children having opportunity to attend accredited schools.

ITEMS	100 Counties	71 Cities	North Carolina
WHITE SCHOOLS			
Elementary			
Total number taught.....	1,487	261	1,748
Possible standard-7 or more teachers.....	653	217	870
Percentage large enough to become standard.....	43.9	83.1	49.8
Number of standard schools.....	310	187	497
Percentage of total schools.....	20.8	71.6	28.4
Percentage of "possible standard".....	47.5	86.2	57.1
Average daily membership-all schools.....	328,350	104,992	433,342
Average daily membership-standard schools.....	117,793	82,953	200,746

Average daily membership-standard schools.....	19,864	16,824	36,688
Percentage in standard schools.....	88.2	96.0	91.6

TABLE XXI. COMPARISON OF RURAL ELEMENTARY SCHOOLS

This tabulation—a summary of several tables—groups by size and race the rural elementary schools of the State during 1940-1941 to show the relative attainments of each group as to attendance, holding-power of schools and work accomplished.

SIZE OF SCHOOLS	Num-ber of Schools	Enroll-ment by Units x	Proportion of Total	Average Daily Member-ship	Average Daily Attend-ance	Percent-age of Attend-ance	Dropping Out of School	Proportion of Enroll-ment Lost x	Member-ship (Last Day of School)	Pupils Doing		Index of Accom-plishment†	Number of Teachers z
										Full Year's Work	Less Than Half Year's Work		
WHITE SCHOOLS													
One teacher.....	256	8,434	2.3	7,253	6,279	86.6	945	11.8	7,089	5,387	1,000	702	256

TABLE XXIV. TRANSPORTATION OF PUPILS, 1940-1941

This table gives information for those units—mostly counties—which transported children to and from school during 1940-1941. The transportation to city units which was paid for by the county is usually shown as rural except where days of transportation exceeded 160.

Units	White							Negro								
	No. Buses and Other Vehicles Used	No. Schools to Which Pupils Transported	Average Number per Pupil Transported Daily	Total Daily Mileage of All Vehicles	Average Number per Day All Vehicles Operated	Operating Cost 1940-41	Year's Cost per Pupil Transported	Daily Cost per Pupil Transported	No. Buses and Other Vehicles Used	No. Schools to Which Pupils Transported	Average Number per Pupil Transported Daily	Total Daily Mileage of All Vehicles	Average Number per Day All Vehicles Operated	Operating Cost 1940-41	Year's Cost per Pupil Transported	Daily Cost per Pupil Transported

TABLE XXV. SCHOOL LIBRARIES

This summary gives by race for the combined county and city systems of the State during 1940-1941: the number of libraries in elementary and high schools, the total number of libraries, the number of volumes in these libraries, their estimated value, the amount expended for library maintenance (current expense) and for purchase of new books (capital outlay). At bottom of page is a comparison of the number of books in school libraries during the past ten years.

ITEMS	100 Counties	71 Cities	North Carolina
TOTAL NUMBER OF SCHOOL LIBRARIES -----	2,428	542	2,970
White-----	1,724	355	2,079
Negro-----	704	187	891
In elementary schools-----	1,628	382	2,010
White-----	1,074	257	1,331
Negro-----	554	125	679
In high schools-----	800	160	960
White-----	650	98	748
Negro-----	150	62	212
TOTAL VOLUMES IN SCHOOL LIBRARIES -----	1,494,747	816,797	2,311,544
White-----	1,306,833	662,135	1,968,968

Negro-----	6,850.39	7,229.11	14,079.50
New books (capital outlay)-----	62,281.77	49,387.48	111,669.25
White-----	56,233.50	38,851.58	95,085.08
Negro-----	6,048.27	10,535.90	16,584.17
NUMBER VOLUMES IN SCHOOL LIBRARIES			
1931-1932-----	873,739	521,528	1,395,267
1932-1933-----	961,292	528,055	1,489,347
1933-1934-----	1,063,531	*501,397	1,564,928
1934-1935-----	1,107,816	529,019	1,636,835
1935-1936-----	1,168,049	571,174	1,739,223
1936-1937-----	1,254,545	643,824	1,898,369
1937-1938-----	1,337,104	648,880	1,985,984
1938-1939-----	1,336,803	700,362	2,067,165
1939-1940-----	1,408,150	755,033	2,163,183
1940-1941-----	1,494,747	816,797	2,311,544

*The apparent decrease for cities was due to change of territory for administrative purposes. In 1932-1933 there were 93 cities and towns operating as units of administration; in 1933-1934 these were reduced to 67, the 26 smaller towns being transferred to county systems. In 1935-1936 there were 68 city units; for 1940-1941 the number has increased to 71.

TABLE VII. EXPENDITURES FOR GENERAL CONTROL

This summary shows administrative expense (except State) for all public elementary and secondary schools of North Carolina during 1940-1941. The amounts paid superintendents and clerical assistants are reduced to average annual basis.

Average salaries were determined by a division of the amounts paid (codes 611 and 644 for superintendents, codes 613 and 627-1 for clerical assistants) by the number of people employed, as shown on Table XVI of Section I.

A separation of administrative costs between white and Negro schools, also shown, was made by pro-rating enrollment (a+d+e) in each unit.

Expenditures for State administration—not given here—are set forth in Table XVI of Section III.

ITEMS	Code	100 Counties	71 Cities	North Carolina
EXPENDITURES				
Salaries of superintendents.....	611	\$ 320,316.63	\$ 216,836.15	\$ 537,152.78
Travel of superintendents.....	612	46,482.21	17,017.62	63,499.83
Salaries of clerical assistants.....	613	147,665.06	67,846.92	215,511.98
Office expense.....	614	38,228.65	22,969.01	61,197.66
TOTAL—Superintendents' Offices.....		\$ 552,692.55	\$ 324,669.70	\$ 877,362.25
Boards of Education—per diem, travel.....	615	30,904.63	882.60	31,787.23
Treasurers—salaries, commissions, surety bonds.....	616	4,582.06	10,472.54	15,054.60
Attendance officers—salaries.....	617-1	6,180.00	8,011.32	14,191.32
Attendance officers—travel.....	617-2	2,450.62	870.44	3,321.06
Audits.....	618-1	13,655.80	7,907.50	21,563.30
Attorneys, elections.....	618-2	5,413.87	3,775.71	9,189.58
TOTAL—General Control.....	61	\$ 615,879.53	\$ 356,589.81	\$ 972,469.34
White.....		435,193.37	242,402.32	677,595.69
Negro.....		180,686.16	114,187.49	294,873.65
AVERAGE ANNUAL SALARIES				
Superintendents.....		\$ 3,098.14	\$ 2,888.95	\$ 3,009.70
Clerical assistants.....		1,088.73	782.67	941.20
In superintendents' offices.....		1,099.52	830.44	997.74
In principals' offices*.....		726.62	699.63	701.75

*Salaries paid these are coded 627-1; see Tables VIII and IX

TABLES VIII AND IX. EXPENDITURES FOR INSTRUCTIONAL SERVICE

These two tables (pages 164-183) give by race for each county and city school system of the State during 1940-1941: the amounts paid teachers in elementary and secondary schools, the amounts paid principals and supervisors, the cost of supplies, of textbooks (free to pupils) in elementary schools, of vocational education and of all other items of instructional service. Table VIII is devoted to instruction in elementary schools (grades 1-7); Table IX gives data as to instructional costs in secondary schools (grades 8-12).

The summary of the two tables shows by race the average salaries paid teachers and principals during 1940-1941. Procedure was division of salary costs, as set forth in these tables, by the number of people employed, as shown in Table XVI of Section I. Since the cost of vocational education is coded separately (626), all vocational teachers were deducted from the total of Table XVI before computing the averages. Expenditures for vocational education (626) are reduced to a per-teacher basis; this item includes salaries, travel and all other expense in this field.

TABLE XVI. COUNTY TAX RATES

This table shows for each county the tax rate levied on property during 1940-1941 for schools, for purposes other than schools and for all purposes; then gives the proportion which went to schools. Taxes levied by districts (rural or city) are not considered.

COUNTIES	For Schools				Other Than Schools	Total Rate	Percentage for Schools
	Current Expense	Capital Outlay	Debt Service	Total			
Alamance.....	\$.078	\$.167	\$.21	\$.455	\$.675	\$ 1.13	40.3

Yancey.....	.07	.13	.10	.30	1.40	1.70	17.6
North Carolina							
Unweighted Average*.....	.095	.079	.219	.393	.892	1.285	30.6
Weighted Average*.....	.074	.074	.189	.337	.678	1.015	33.2

*The unweighted average is the sum of tax-rates divided by 100, the number of counties. The weighted average takes assessed valuations into consideration and reduces the sum of the yields in all counties to one rate which if levied uniformly over the State would produce the same amount. The difference between the two proportions for schools, according to these two methods of calculation, is not large enough to be significant.

TABLE XVII. PROPORTION OF COUNTY TAX RATES
FOR SCHOOLS

This table shows by counties for a six-year period—1935 to 1941—the proportion of property taxes levied which went to support schools. The double lines divide the years into legislative bienniums.

The summary gives for above years an unweighted average of the property tax rates levied for schools, for other purposes, for all purposes and the unweighted proportion which went to schools. Calculations have shown—as indicated on Table XVI—that the difference between a weighted and unweighted percentage for schools is not large enough to be significant.

SUMMARY OF TABLE XVII

YEARS	Property Tax Rates			Percentage for Schools
	For Schools	Other Than Schools	Total	
1935-1936.....	\$.319	\$.828	\$ 1.147	27.8

TABLE XVIII. CITY TAX RATES

This table shows for 71 cities of the State—those operating as school administrative units, arranged alphabetically by counties—the tax rates on property levied during 1940-1941 for schools, for purposes other than schools and for all purposes; then gives the proportion which went to schools. Taxes levied by counties (see Table XVI) are additional.

At the bottom of table is an unweighted average of city tax rates for several years.

CITIES	For Schools				Other Than Schools	Total Rate	Percentage for Schools

SECTION I
GENERAL STATISTICS
1941-1942

TABLE I. POPULATION, MEMBERSHIP, ATTENDANCE

This table shows by race for each county (rural) and city school system of the State during 1941-1942: the school population (ages 6-21 years), the average daily membership and the average daily attendance.

The summary gives the population, membership and attendance figures for North Carolina and a series of percentage calculations.

SUMMARY OF TABLE I.

ITEMS	100 Counties	70 Cities	North Carolina
SCHOOL POPULATION.....	815,111	312,273	1,127,384

TABLE II. ENROLLMENT (a+d+e) BY SIZE OF SCHOOL

This summary gives by race—for all administrative units of the State during 1941-1942—a distribution of pupils enrolled by units (a+d+e) according to size of school. Elementary and secondary schools are considered separately.

SUMMARY OF TABLE II.

ITEMS	100 Counties	70 Cities	North Carolina
ENROLLMENT (a+d+e) IN ELEMENTARY SCHOOLS (Grades 1-7)			
One Teacher.....	29,790	1,464	31,254
White.....	6,600	179	6,779
Negro.....	23,190	1,285	24,475
Two to Three Teachers.....	88,136	5,215	93,351

TABLE III. ENROLLMENT (a+d+e) BY LENGTH OF TERM

This summary shows for 1941-1942: the enrollment by units (a+d+e) for all schools of the State, those enrolled in two or more units (pupils coded d), the net State enrollment (a+e). There is also a distribution—in numbers and in percentage—of the enrollment by units (a+d+e) according to length of school term.

ITEMS	100 Counties	70 Cities	North Carolina
ENROLLMENT BY UNITS (a+d+e)	653,738	245,384	899,122
Elementary Schools (grades 1-7).....	516,859	173,434	690,293

TABLE IV. AVERAGE TERM IN DAYS

This table shows separately for each race and in combination the average term in days of the elementary and secondary schools in each administrative unit of the State during 1941-1942. The calculations are based upon the figures of Table III.

The summary gives pertinent facts concerning deviations from the State-supported term of 160 days.

SUMMARY OF TABLE IV

ITEMS	Counties	Cities	North Carolina

TABLE V. ENROLLMENT, LOSSES, MEMBERSHIP BY GRADES

This tabulation—a summary of several tables—shows by grades for the State during 1941-1942: the number of different children enrolled (a+e), the number of children dropping out of school or losses, the membership on last day of school and the percentage of enrollment which quit school.

GRADES	WHITE				NEGRO			
	Enroll- ment	Losses	Member- ship	% Lost	Enroll- ment	Losses	Member- ship	% Lost

TABLE VIII. PUPIL-WORK ACCOMPLISHMENT BY GRADES 27

This tabulation shows by grades and race for county (rural) and city school systems of the State during 1941-1942: the number of pupils receiving credit for work of full year, the number performing at least half year's work (50-99%), and the number accomplishing less than work of half year. The sum of these three groups equals the membership of Table V, thus accounting for all pupils on the roll at close of schools.

TABLE IX. INDEX OF ACCOMPLISHMENT BY GRADES

This tabulation reduces the figures of Table VIII to percentages and gives an index of work accomplished in the several grades. The index is the addition of percentages weighted according to quantity of work done; to the proportion of pupils doing full year's work are added: (1) 50% of the percentage for half year's work, (2) 25% of the proportion for less than half year.

This index considers only those pupils on the roll at close of school; for a ratio based upon enrollment (a+e), see Table XII.

TABLE X. INDEX OF ACCOMPLISHMENT

ELEMENTARY SCHOOLS—GRADES 1-7

Based upon the figures summarized by Table VIII, this table shows by race for the elementary schools (grades 1-7) in each administrative unit of the State during 1941-1942: the percentage of membership (last day of school) which received credit for full year's work (100% in quantity), the percentage which was credited with half-year's work (50-99%), the percentage which received credit for less than work of half-year and an index figure which weights and combines these percentages. The index number, as in Table IX, allows full credit (100%) for that proportion of pupils accomplishing (receiving credit for) work of full year, half credit (50%) for the percentage doing half-year's work, one-fourth credit (25%) for the remaining proportion of pupils. The index is the sum of these three credits with *100.0 representing quantitative perfection.

The summary groups the administrative units of the State—separately by race—according to their positions as indicated by this index number. The index attempts to measure quantitatively the work accomplished during the year by pupils remaining in school; those who quit school (losses) are not considered in these calculations. An index number based upon enrollment, as are the percentages of Table XII, would be lower than the one shown here.

TABLE XI. INDEX OF ACCOMPLISHMENT

SECONDARY SCHOOLS—GRADES 8-12

Based upon the figures summarized by Table VIII, this table shows by race for the secondary schools (grades 8-12) in each administrative unit of the State during 1941-1942: the percentage of membership (last day of school) which received credit for full year's work (100% in quantity), the percentage which was credited with half year's work (50-99% in quantity), the percentage which received credit for less than work of half year and an index figure which weights and combines these percentages. The index number, as in Table IX, allows full credit (100%) for that proportion of pupils accomplishing (receiving credit for) work of full year, half credit (50%) for the percentage doing half year's work, one-fourth credit (25%) for the remaining proportion of pupils. The index is the sum of these three credits—with *100.0 representing quantitative perfection.

The summary groups the administrative units of the State—separately by race—according to their positions as indicated by this index number and shows the number of units which have no high school facilities (by comparison with Table X). The index attempts to measure quantitatively the work accomplished during the year by pupils remaining in school; those who quit school (losses) are not considered in these calculations. An index number based upon enrollment, as are the percentages of Table XII, would be lower than the one shown here.

TABLE XII. RELATIVE ACCOMPLISHMENT OF PUPILS BY GRADES

This tabulation divides the net State enrollment (a+e) into percentages, showing by race for each grade during 1941-1942: (1) the percentage dropping out of school, (2) the proportion doing full year's work, (3) the percentage doing half year's work, (4) the proportion accomplishing work of less than half year. This is an effort to measure the holding and promoting achievements of the school system.

Whereas Table IX considered only the children remaining in school, this calculation is based upon pupils enrolled (a+e).

GRADES	White Percentage of Enrollment				Negro Percentage of Enrollment			
	Dropping Out of School	Doing Full Year's Work	Doing Half Year's Work	Doing Less Than Half Year	Dropping Out of School	Doing Full Year's Work	Doing Half Year's Work	Doing Less Than Half Year

INDEX OF TRAINING*	All	785.0	801.7	789.4
White.....	All	791.4	802.2	794.1
Negro.....	All	768.7	800.7	778.0

*In this index, 900 is the maximum; that is, if all teachers held the Graduate Certificate, the index number would be 900.

TABLE XIV. SALARY SCHEDULES FOR TEACHERS

This table gives the maximum and minimum amounts payable monthly to teachers during the school term for 1941-1942. The schedules are based upon years of training, which control the type of certificate held, and years of teaching experience. A represents the maximum; B is the minimum.

A. MAXIMUM

TEACHING EXPERIENCE	Elementary A 1 Year College	Class C 2 Years College	Class B 3 Years College	Class A 4 Years College	Graduate 5 Years College
0	\$ 69.00	\$ 76.00	\$ 82.00	\$ 96.00	\$-----
1	72.00	79.00	86.00	100.00	-----
2	76.00	83.00	89.00	103.00	114.00
3	-----	86.00	93.00	106.00	118.00
4	-----	89.00	96.00	110.00	122.00
5	-----	-----	100.00	114.00	128.00
6	-----	-----	104.00	118.00	133.00
7	-----	-----	-----	122.00	136.00
8	-----	-----	-----	128.00	139.00
9	-----	-----	-----	133.00	142.00
10	-----	-----	-----	-----	145.00
11	-----	-----	-----	-----	150.00

B. MINIMUM

TEACHING EXPERIENCE	Elementary A 1 Year College	Class C 2 Years College	Class B 3 Years College	Class A 4 Years College	Graduate 5 Years College
0	\$ 55.00	\$ 58.00	\$ 63.00	\$ 87.00	\$-----
1	58.00	61.00	66.00	90.00	-----
2	60.00	63.00	69.00	93.00	102.00
3	-----	66.00	72.00	96.00	105.00
4	-----	69.00	74.00	99.00	108.00
5	-----	-----	77.00	102.00	111.00

10	-----	-----	-----	-----	127.00
11	-----	-----	-----	-----	130.00

TABLE XV. SALARY SCHEDULES FOR PRINCIPALS

This table shows the maximum and minimum amounts payable monthly during the school term to classified principals for 1941-1942. Usually a school must have seven (7) or more teachers to be allowed a classified principal. The schedule is based upon number of teachers allotted to the school and number of years served as principal. There is an increase in principal's pay for each additional teacher—from 7 to 50; enough steps in the schedule are given here to show the trend.

A. MAXIMUM

NUMBER OF TEACHERS	P-0	P-1	P-2	P-3	P-4	P-5
7	\$ 130.00	\$ 137.00	\$ 144.00	\$ 151.00	\$ 158.00	\$ 165.00
10	151.00	158.00	165.00	171.00	178.00	185.00
13	170.00	177.00	184.00	191.00	198.00	205.00
16	187.00	194.00	201.00	208.00	215.00	222.00
20	207.00	214.00	221.00	228.00	235.00	242.00
24	223.00	230.00	237.00	244.00	251.00	258.00
28	239.00	246.00	253.00	260.00	267.00	274.00

36	204.50	210.00	215.50	221.00	226.50	232.00
40	210.50	216.00	221.50	227.00	232.50	238.00
45	215.50	221.00	226.50	232.00	237.50	243.00
50	220.50	226.00	231.50	237.00	242.50	248.00

TABLE XVI. SALARY SCHEDULE FOR SUPERINTENDENTS

The salary schedule for superintendents during 1941-1942 was based upon enrollment (a+e) for preceding year with additional sums—in decreasing amounts for each 25 teachers—according to total number of teachers allowed. No salary for 1941-1942 was made lower than the one received during 1940-1941. A maximum of \$3,500 was possible. In the lower brackets each administrative unit constituted a step in the salary schedule.

There is given below a summary of how the salaries paid by the State were distributed. Supplements by the units are not considered; see Table VII of Section II for the actual average.

SUMMARY OF SALARIES PAID BY STATE

AMOUNTS	County Units	City Units	North Carolina
Up to \$2,100.....	4	10	14
\$2,101—\$2,400.....	8	20	28
2,401— 2,700.....	6	15	21
2,701— 3,000.....	12	8	20
3,001— 3,300.....	42	7	49
3,301— 3,500.....	28	7	*35
	100	†67	167
AVERAGE SALARY.....	\$ 3,046.37	\$ 2,564.66	\$ 2,853.11

*27 units (20 counties, 7 cities) were allowed the maximum of \$3,500.

†Due to superintendent having charge of county and city system in 3 instances (Lee, Richmond, Vance), only 67 salaries for city units are shown.

TABLE XVII. INSTRUCTIONAL AND SUPERVISORY PERSONNEL

This table gives for each unit of the State during 1941-1942 a distribution of instructional and supervisory personnel—employed from all sources of funds—by race and grade-level. Teachers, as distinguished from principals and supervisors, are divided according to sex.

The summary shows for North Carolina the number of teachers in elementary schools, the number in high schools (grades 8-12), the number of vocational teachers, the number of principals and supervisors, the number of clerical assistants, the number of superintendents; then relates the instructional personnel to number of pupils shown in Table I. Average daily membership and average daily attendance are both used as measures of the teaching load.

Fractions appear in the summary and the detailed table because of teachers working in elementary and high schools, or teaching and supervising.

SUMMARY OF TABLE XVII

ITEMS	100 Counties	70 Cities	North Carolina
NUMBER OF TEACHERS			
In elementary schools (grades 1-7)	13,580	4,427	18,007

TABLE XIX. SCHOOLHOUSES AND SCHOOL PROPERTY

This table shows by race for each county and city unit of the State during 1941-1942: the value of school property, the number of schoolhouses owned, the average value of schoolhouses, the total number of classrooms and the average number of classrooms per school. With races combined, the value of school property, total number of schoolhouses and their average value appear for each unit.

The summary gives several details of valuation for all school systems and relates these figures to the number of schoolhouses, classrooms, teachers and pupils.

SUMMARY OF TABLE XIX

ITEMS	100 Counties	70 Cities	North Carolina
VALUE OF ALL SCHOOL PROPERTY.....	\$ 69,783,330	\$ 54,543,801	\$124,327,131
Sites and buildings.....	61,678,084	49,088,583	110,766,667
Furniture, equipment.....	6,724,863	4,648,858	11,373,721
Library books.....	1,380,383	806,360	2,186,743
VALUE OF WHITE SCHOOL PROPERTY.....	62,385,945	45,694,081	108,080,026
Sites and buildings.....	55,261,132	41,078,374	96,339,506

TABLE XX. NUMBER OF SCHOOL UNITS TAUGHT—BY SIZE

This table shows by race for each county and city system of the State during 1941-1942: the number of elementary and high school units taught, divided according to number of teachers employed, and the number of union schools. The union school includes work in both elementary and secondary fields.

The summary gives the North Carolina total for each race with division between counties and cities. There also appears the number of separate elementary and separate high schools, as distinguished from the union schools.

SUMMARY OF TABLE XX

ITEMS	100 Counties	70 Cities	North Carolina
WHITE SCHOOL UNITS TAUGHT.....	2,095	366	2,461
Elementary Schools.....	1,433	258	1,691

TABLE XXI. NUMBER OF SCHOOL UNITS TAUGHT—BY GRADE LEVEL

This summary shows for 1941-1942 the number of schools which attempted various grade levels of instruction. On the elementary level there are three types of schools: primary, grammar and elementary. Primary schools are defined as those which go no higher than grade 4, beginning with first grade; grammar schools teach only the intermediate grades, as 4-6, 5-7; elementary schools cover grades 1-5, 1-6 or 1-7.

On the secondary level there is grouping of schools according to number of years of instruction offered. One-year high schools teach only 8th grade, two-year schools have grades 8 and 9, five-year schools include the work of grades 8-12. Junior high schools are listed with the short-program schools while senior high schools (covering last two or three years of secondary curriculum) are shown separately.

x This figure counts children twice if enrolled in more than one school system.

y See page 28 for description of this index.

z Vocational teachers included, principals excluded.

TABLE XXV. TRANSPORTATION OF PUPILS, 1941-1942

This table gives information for those units—mostly counties—which transported children to and from schools during 1941-1942. The transportation to city units which was paid for by the counties is usually shown as rural except where term exceeded 160 days.

TABLE XXVII. SCHOOL LIBRARIES

This summary gives by race for the combined county and city systems of the State during 1941-1942: the number of libraries in elementary and high schools, the total number of school libraries, the number of volumes in those libraries, their estimated value, the amount expended for library maintenance (current expense) and for purchase of new books (capital outlay). At bottom of page is a comparison of the number of books in school libraries during the past ten years.

ITEMS	100 Counties	70 Cities	North Carolina
TOTAL NUMBER OF SCHOOL LIBRARIES -----	2,465	546	3,011
White-----	1,729	357	2,086
Negro-----	736	189	925
In elementary schools (grades 1-7)-----	1,656	388	2,044
White-----	1,072	262	1,334
Negro-----	584	126	710
In high schools (grades 8-12)-----	809	158	967
White-----	657	95	752
Negro-----	152	63	215
TOTAL VOLUMES IN SCHOOL LIBRARIES -----	1,632,583	902,859	2,535,442
White-----	1,430,567	730,932	2,161,499
Negro-----	202,016	171,927	373,943
In elementary schools (grades 1-7)-----	923,853	515,106	1,438,959
White-----	815,073	426,161	1,241,234
Negro-----	108,780	88,945	197,725

* The apparent decrease for cities is due to change of territory for administrative purposes. In 1932-1933 there were 93 cities and towns operating as units of administration; in 1933-1934 these were reduced to 67, the 26 smaller towns being transferred to county systems. In 1935-1936 there were 68 city units; during 1939-1941 the number increased to 71; for 1941-1942 there were 70.

TABLE VII. EXPENDITURES FOR GENERAL CONTROL

This summary shows administrative expense (except State) for all public elementary and secondary schools of North Carolina during 1941-1942. The amounts paid superintendents and clerical assistants are reduced to average annual basis.

Average salaries were determined by a division of amounts paid (codes 611 and 644 for superintendents, 613 and 627-1 for clerks) by the number of people employed, as shown on Table XVII of Section I.

A separation of administrative costs between white and negro schools, also shown, was made by pro-rating average daily membership in each unit.

Expenditures for State administration—not shown here—are set forth in Table XV of Section III.

ITEMS	Code	100 Counties	70 Cities	North Carolina
EXPENDITURES				
Salaries of superintendents.....	611	\$ 322,149.46	\$ 219,315.06	\$ 541,464.52
Travel of superintendents.....	612	50,006.50	19,521.31	69,527.81
Salaries of clerical assistants.....	613	161,120.86	81,164.86	242,285.72
Office expense.....	614	47,854.96	28,017.75	75,872.71
TOTAL—Superintendents' offices.....		\$ 581,131.78	\$ 348,018.98	\$ 929,150.76
Boards of Education—per diem travel.....	615	29,721.78	149.53	29,871.31
Treasurers—salaries, commissions, surety bonds.....	616	4,340.99	5,691.76	10,032.75
Attendance officers—salaries.....	617-1	11,662.50	7,249.33	18,911.83
Attendance officers—travel.....	617-2	3,775.75	1,429.97	5,205.72
Audits.....	618-1	15,028.50	8,609.48	23,637.98
Attorneys, elections.....	618-2	3,981.46	3,621.30	7,602.76
TOTAL—General Control.....	61	\$ 649,642.76	\$ 374,770.35	\$ 1,024,413.11
White.....	61	461,170.99	254,987.70	716,158.69
Negro.....	61	188,471.77	119,782.65	308,254.42
AVERAGE ANNUAL SALARIES				
Superintendents (611, 644*).....		\$ 3,149.12	\$ 2,996.16	\$ 3,085.00
* Clerical Assistants.....		1,128.63	852.60	993.11
In superintendents' offices.....		1,145.14	940.50	1,067.34
In principals' offices†.....		741.62	716.70	719.13

*See Table XI (page 179).

†Salaries paid these are coded 627-1; see Tables VIII and IX.

TABLES VIII AND IX. EXPENDITURES FOR INSTRUCTIONAL SERVICE

These two tables give by race for each county and city school system of the State during 1941-1942: the amount of salaries paid teachers in elementary and secondary schools, the amount paid principals and supervisors, the cost of supplies, of textbooks (free to pupils) in elementary schools, of vocational education and of all other items of instructional service. Table VIII is devoted to instruction in elementary schools (grades 1-7); Table IX gives data for instructional costs in secondary schools (grades 8-12).

The summary of the two tables shows by race the average salaries paid teachers and principals during 1941-1942. Procedure was division of salary costs, as set forth in these tables, by the number of people employed, as shown in Table XVII of Section I. Since the cost of vocational education is coded separately (626), all vocational teachers were deducted from the total of Table XVII before computing the averages. Expenditures for vocational education (626) are reduced to a per-teacher basis; this item includes travel and other expense in this field as well as salaries.

SUMMARY OF TABLES VIII AND IX

ITEMS	100 Counties	70 Cities	North Carolina
AVERAGE ANNUAL SALARIES			
Teachers in elementary schools.....	\$ 896.00	\$ 1,108.09	\$ 948.15

TABLE XVI. COUNTY TAX RATES

This table shows for each county the tax rate levied on property during 1941-1942 for schools, for purposes other than schools and for all purposes; then gives the proportion which went to schools. Taxes levied by districts (rural or city) are not considered; see Table XVIII.

COUNTIES	For Schools				Other Than Schools	Total Rate	Per-centage for Schools
	Current Expense	Capital Outlay	Debt Service	Total

North Carolina Unweighted Average*	.102	.080	.229	.411	.880	1.291	31.8
Weighted Average*	.081	.075	.187	.343	.659	1.002	34.2

*The unweighted average is the sum of tax-rates divided by 100, the number of counties. The weighted average takes assessed valuations into consideration and reduces the sum of the yields in all counties to one rate which if levied uniformly over the State would produce the same amount. The difference between the two proportions for schools, according to these two methods of calculations, is not large enough to be significant.

TABLE XVII. PROPORTION OF COUNTY TAX RATES FOR SCHOOLS

This table shows by counties for a six-year period—1936 to 1942—the proportion of property taxes levied which went to support schools. The double lines divide the years into legislative bienniums.

The summary gives for above years an unweighted average of the tax rates levied for schools, for other purposes, for all purposes and the unweighted proportion which went to schools. Calculations have shown—as indicated in footnote to Table XVI—that the difference between a weighted and unweighted percentage is not large enough to be significant.

SUMMARY OF TABLE XVII

YEARS	Property Tax Rates			Percentage for Schools
	For Schools	Other Than Schools	Total	
1936-1937-----	\$.324	\$.847	\$ 1.171	27.7
1937-1938-----	.372	.890	1.262	29.5

TABLE XVIII. CITY TAX RATES

This table shows for 70 cities of the State—those operating as school administrative units, arranged alphabetically by counties—the tax rates on property levied during 1941-1942 for schools, for other-than-school purposes and for all purposes; then gives the proportion which went to schools. Taxes levied by counties (see Table XVI) are additional.

At the bottom of table is an unweighted average of city tax rates for several years.
